PREFACE.

THE PUBLIC SCHOOL LATIN PRIMER is founded on a Latin grammar, which has been largely used in English schools during the last twenty years. It has been revised with great care and attention, first by its author, subsequently by the Head-masters of various public schools, with the advice of other scholars engaged in classical instruction.

The Primer is put forth as a standard grammar for all classes in public schools below the highest: and the lesign is, by exhibiting in clear and concise synthesis he leading principles and facts of Latin, to carry earners forward in the right direction to that stage of progress from which they may advance to wider philobgical studies without having anything to unlearn.

In the manner of its use, this book does not differ rom the grammar on which it is founded, or from any other synthetic grammar. Its memorial lessons need liscreet guidance, careful explanation, and sound catehesis on the part of masters. They need also to be upported and supplemented by good exercise-books Subsidia Primaria) of a merely analytic and imitative haracter.

PREFACE.

The distinctive features of the Primer are mainly these :---

- 1. By discerning from the outset the Stem (or Crude Form) of declined words, the learner is prepared to understand the principles of higher philology.
- 2. The arrangement of the Six Cases given by Key, Madvig, and Roby, is adopted.
- 3. The division of the Verb into two parts, Finite and Infinite, appears as in Krüger's grammar.
- 4. Neat and uniform adjustment of the Paradigms is observed as an important aid to the memory.
- 5. The Memorial Syntax appears in English (with the Latin Examples) as well as in Latin, to meet the wish of those masters who object to the use of Latin rules. In the English rules brevity and precision are, as far as possible, preserved.
- 6. An Appendix of brief Notes is given, enabling learners to make considerable advance in the study of Latin.
- 7. A Glossary of Terms is added for the purpose of reference.

Any remarks (sent through the Publishers), which may tend to improve future editions, will be thankfully received and fully considered.

THE

PUBLIC SCHOOL LATIN PRIMER.

ETYMOLOGY.

THE LETTERS.

§ 1. The Latin ALPHABET is the English without W. The Letters have two forms: (1) the Capital, or ancient; and (2) the Cursive, or modern form.

(1) A B C D E F G H I J K L M N O P
(2) a b c d e f g h i j k l m n o p
Q R S T U V X Y Z.
q r s t u v x y z.

§ 2. The Vowels, sounding by themselves, are a, e, i, o, u, y.

 \S 3. The CONSONANTS sound with Vowels: of these

The Mutes are b, c, d, g, k, p, q, and t:

The Liquids are l, m, h, r:

The Spirants f, h, j, s, v:

The Double, x and z, express two letters each, cs, ds.

- 1. K remains in very few words: as, Kalendae.
- 2. Y and z only in words from the Greek : as, Dryas, zona.
- 3. Q blends with u or v: as, quis or qvis.
- 4. I and u are Half-consonants, corresponding to the Halfvowels j and v.

§ 4. Latin has three usual DIPHTHONGS (double vowels), re (x), oe (∞) , au: three seldom used, ei, eu, ui. § 5. Latin is spelt by SYLLABLES, as English.

§ 6. The Quantity of syllables is short (~), long (-), or doubtful (=), as the vowels are short, long, or doubtful : as, fügĕrīs.

A Vowel may be-

(1) Short or long by nature: as, ămās.

- (2) Short by nature, but long by position: as, vindex. § 162. 4.
 (3) Short by nature, but doubtful by position: as, quadruplo. § 162. a.
- 7. Diphthongs are long.
- § 8. The modern Stops are used in Latin.

PARTS OF SPEECH.

§ 9. The Parts of Speech, or Words, are of three kinds: I. NOUNS; II. VERB; III. PARTICLES.

I. (1) The SUBSTANTIVE names a Thing :

As, rex, a king; Caesar, Caesar.

- (a) Names of Persons and Places are PROPER NAMES. All others are Appellativa, or Common Nouns.
- (2) The ADJECTIVE attributes Quality:

As, mărĕ **vastum,** the vast sea. **Vastum** is called an ATTRIBUTE or EPITHET of mare.* NoUNS.

VERB.

- (3) The Pronoun stands for Substantive or Adjective. As, tū, thou; mănus haec, this hand.
- II. (4) The VERB states what a Thing is, does, or suffers:

As, homines canunt, men sing.

- (a) Homines is called the SUBJECT. Cănunt is called the PREDICATE.
- (b) When we say, Mors est propinquă, *death is nigh*, Mors is the Subject; Est is called the COPULA; Propinqua is called the COMPLEMENT; And Copula with Complement is the Predicate.

* A Substantive attributively joined to another Substantive is called its APPOSITE : as, Croesas rex Lydorum, Croesus, king of the Lydians, where rex is Apposite to Croesus, and agrees with it in Case.

FLEXION.

- III. (5) The ADVERB shows Where, When, or How: As, Hūc curre nunc celeriter, run hither now quickly.
 - (6) The PREPOSITION governs the Case of a Noun; and shows the relation of it to some other word :

As, sto ăd fores, I stand at the door.

- (7) The Conjunction links words and clauses: As, ŏvēs ĕt ăvēs, sheep and birds.
- (8) The INTERJECTION is an exclamation : As, ecce ningit, lo, it snows.

Note. There is no Article in Latin like a, an, the, in English. Thus lux may mean a light, the light, or simply light.

§ 10. Hence the Parts of Speech may be called eight:

- 1. Substantive.
- 2. Adjective,
- 3. Pronoun,
- 4. Verb,

5. Adverb,

- 6. Preposition,
- 7. Conjunction,
- 8. Interjection,

Which have Flexion.

Which are without Flexion.

§ 11. (1) The changes made in a word, in order to vary its meaning, are called its FLEXION or INFLECTION.

(2) Nouns are Declined.

Verbs are CONJUGATED.

(3) A Noun has three Accidents: NUMBER, CASE, GENDER; A Verb five: VOICE, MOOD, TENSE, NUMBER, PERSON.

a. The STEM is that part of a word on which the changes of Flexion are based.

b. A Flexional addition at the end of the Stem is called an ENDING or SUFFIX.

c. The last letter of the Stem is called the CHARACTER, and in this book is often indicated by a Capital.

d. The Stem of a Noun is usually discerned by casting off -rum or -um from the Genitive Plural :* as, mensa-, domino-, leon-, mari-, grădu-, dĭE-.

e. The Stem of a Verb is shown in the Imperative Mood: as, ăma-, audi-, mone-. But in the Third Conjugation -e must be cast off: as,

rëc-ë; and in a Deponent Verb -rë or -ërë: as, fa-rë, rE-rë, lāB-ërë. f. The Root is that part which a word has in common with kin-dred words. Thus in ăgitārë, ăgita- is the Stem, but ag- the Root as shown by comparing ag-ere, ag-men. And g is the Root-character.

* Dropping *-rum* in the First, Second, and Fifth Declensions; *-um* in the hir, and Fourth.

PARTICLES.

SUBSTANTIVES.

DECLENSION OF NOUNS.

§ 12. The Substantive is declined by Number and Case : the Adjective by Number, Case, and Gender, agreeing in these with its Substantive. See § 9 (2).

§ 13. The Numbers are two: 1. SINGULAR, speaking of one, as mensă, a table; 2. PLURAL, of more than one, as mensae, tables.

§ 14. The Cases are six.

| | Answers the question | | |
|------------------|-----------------------------------|--|----------------------|
| 1. Nominative . | . Who or what? | Quĭs dĕdĭt? : } Who gave? : } | Vĭr, |

| 6. Ablative * . | . By, with, &c., whom or what? | \bar{A} quō dǎtum? By whom given? } | Ā vīrō, By a man. |

§ 15. The Genders are three: 1. MASCULINE; 2. FEMININE; 3. NEUTER. A Substantive which may be either Masculine or Feminine is said to be COMMON to both Genders.

SUBSTANTIVES.

§ 16. There are five Declensions of Latin Substantives, known by the endings of their Genitives :---

| | I. | II. | III. | IV. | v. |
|------------|------|-------------------------------------|------------|-----|------|
| Gen. Sing. | ae | ī | ĭs | ūs | ĕī |
| Gen. Plur. | Ārum | $\overline{\mathrm{O}}\mathrm{rum}$ | um† or Ium | Uum | Ērum |

§ 17. (1) In Neuter Nouns, the Nominative, Vocative, and Accusative are the same in each Number severally; and in the Plural they end in ä.

(2) The Vocative of Latin words is the same as the Nominative, except in Singular Nouns of the Second Declension like dominus, filius. (3) The Dative and Ablative Plural are always the same.

* Many English Particles may be signs of the Latin Ablative : as, by, with, from, in, upon, of, for, at, than. † The Consonant before um is the Character. See 11 c; § 21 (a).

THIRD DECLENSION.

THE THIRD DECLENSION (Consonant and I-nouns),

§ 20. The Third Declension has two Divisions :

I. Nouns which have for Character a Consonant.

II. Nouns which have for Character the Half-consonant I.

Of these Divisions the First is Imparisyllable, having more syllables in the Genitive than in the Nominative Singular.

The Second is Parisyllable, having the same number of syllables in the Genitive as in the Nominative.

But a few Parisyllable Nouns belong to the Consonant Division; and many Imparisyllable Nouns to the I-Division. The Endings of the Nominative Singular are numerous.

Note 1. The Present, the Futures, and the Present Past (ămāvī, I have loved) are called Primary Tenses: the Imperfect, Pluperfect, and Simple Perfect (ämāvī, I loved) Historic Tenses.
Note 2. A. The Perfect is formed in several ways :--1. By adding vī to the Stem : as, āmāvī, flêvī. 2. By adding úī (for vi) to the Stem or Clipt Stem :* as, côlūī, monūī. 3. By adding sī to the Stem or Clipt Stem : as, carpsī, mansī. In this formation Consonants are generally changed (see §81). 4. By prefraing a Reduplication, and adding ī to the Stem : as, cũcurrī, mŏmordī; or the first Consonant and Vowel of the Stem: as, cũcurrī, mŏmordī; or the first Consonant with ö, in which case the Stem-vowel is usually changed; see §81; §111 (9). 5. By adding ī to the Stem or Clipt Stem vithout change of the Stem-vowel: as, blbī, vertī, ēgī (from ăgō), fāvī (from fāvēō).
B. The Supine is formed :--1. By adding to the Stem or Clipt Stem tum, sometimes i-tum, and a change of letters often takes place: as, mātum, cultum, return, mön-tum. 2. The change of letters often requires tum to become sum. See Examples in §81.

Note 3. The learner should bear in mind that the English given in the following Tables for the Tenses of Verbs is often only one of several possible meanings; especially in the Conjunctive Mood.

§ 49. Before the regular Verbs, it is necessary to conjugate the irregular but important Verb of Being, sum, esse, which lends its forms to complete the conjugation of other Verbs.

* A Clipt Stem is a Stem without its Vowel Character: as, mon- for monE-.

In translating, it is only required to construe each part of the Verb sum, as given in the Table, § 50, with each Participle: as, ämätürüs sum, I am about to love; ämandus sum, I am meet to be loved (or, I am to be loved). So also fŭtūrŭs sum, I am about to be; fŭtūrŭs sim, čram, essem, &c.

PERIPHRASTIC CONJUGATION.

SIGNS OF THE TENSES AND MOODS.

SIGNS OF THE TENSES AND MOODS.

§ 65. The Latin Tenses may be variously rendered : as,

INDICATIVE MOOD.

Pres. ămō, love, am loving.

Imp. ămābam, loved, was loving, used to love.

Perf. ămāvī, loved (Simple Past), have loved (Present Past).

§ 66. The Conjunctive Mood has two general uses:

(1) Pure, or not subordinate to another Verb:

(2) Subjunctive, or subordinate to another Verb.

1. The Pure Conjunctive is rendered in English with auxiliary Verbs for Signs; generally would or should; sometimes can, could; may, might; shall, or will: as,

ămem tē (sī bŏnŭs sīs), I can love you (if you are good).

ămārem tē (sī bŏnŭs essēs), I should—would—love you (if you were good), or I should have been loving you (if you were good).

ămāvissem tē (sī bŏnŭs fŭissēs or essēs), I should—would—have loved you (had you been good).

2. When the Mood is Subjunctive, it sometimes has a sign in English: as, Edĕ ŭt vīvās, *eat that you* may *live*; but oftener it must be rendered as if it were Indicative: as sīs, essēs, fŭissēs, in the last Examples. So:

Laudātur quod pārušrit, *he is praised* in that he obeyed. Laudāvī eum quī pārušsset, *I praised him* (as one) who had obeyed.

§ 67. The Present Conjunctive is also used Imperatively:

| Active. | | Passive. | |
|--|-------|--|-----------|
| Amem, may I, or let me | | Amer, may I, or let me | |
| Amēs, mayst thou, or see | | Amēris, mayst thou, or see | ~ |
| thou Ămět, may he, or let him Ămēmŭs, may we, or let us Ămētĭs, may ye, or sce ye Ăment, may they, or let them | love. | thou Ămētŭr, may he, or let him Ămēmŭr, may we, or let us Ămēmĭnī, may ye, or see ye Ămentŭr, may they, or let them) | he loved. |

THE INFINITIVES.

THE INFINITIVES.

§ 68. The Infinitives in rĕ, rī, are Present or Imperfect; Infinitives in issĕ, tŭs-essĕ, Perfect or Pluperfect: as,

| (1) | Dicitur amare, (1) | Dicitur amari, |
|-----|----------------------------------|--|
| | He is said to be loving. | He is said to be loved. |
| | Dīcēbatŭr ămārĕ, | Dīcēbātŭr ămārī, |
| | He was said to have been loving. | He was said to have been (at the time) loved. |
| | Sciŏ ĕum ămārĕ, | Scĭŏ ĕum ămārī, |
| | I know (that) he is loving. | I know (that) he is loved. |
| | Sciēbam ĕum ămārĕ, | Sciēbam ĕum ămārī, |
| | I knew (that) he was loving. | I knew (that) he was loved. |
| (2) | Dīcītūr ămāvissē, (2) | Dīcitŭr ămātŭs essĕ, |
| | He is said to have loved. | He is said to have been loved, |
| | Dīcēbātŭr ămāvissĕ, | Dīcēbātŭr ămātŭs essĕ, |
| | He was said to have loved. | He was said to have been (at a former time) loved. |
| | Sciŏ ĕum ămāvissĕ, | Sciŏ ĕum ămātum essĕ, |
| | I know (that) he loved. | I know he was loved. |
| | I know (that) he has loved. | I know he has been loved. |
| | Sciēbam ĕum ămāvissĕ, | Sciēbam ĕum ămātum essĕ, |
| | I knew (that) he had loved. | I knew he had been loved. |

§ 69. A. The Future Infinitive Active has two forms, -ūrūs essě, -ūrūs fŭissě, the uses of which a few instances will show :---

- (a) Crēděrís itūrŭs essě, you are believed to be about to go. Crēdô tē itūrum essě, I believe (that) you will go.
- (b) Crēdēbāris itūrūs essē, you were believed to be about to go. Crēdēbam tē itūrum essē, I believed that you would go.
- (c) Crēděrís itūrůs fŭissě, you are believed to have been about to go. Crēdō tē itūrum fŭissě, I believe that you would have gone. p. 3

B. The Future Infinitive Passive is formed by the union of the Supine in um with the Impersonal Infinitive īrī: as,

Crēdō ămātūm īrī Jūlĭam, (lit.) I believe there-is-a-going to love Julia i.e., I believe Julia will be loved.

Aiunt ultum īrī injūriās, they say that the wrongs will be avenged.

a. The same may be expressed by fŭtūrum essě ŭt, fŏrě ŭt, with ămētūr, ămārētūr; as,

Crēdō fūtūrum-essě (or fŏrě) ŭt Jūlĭă ămētŭr, I believe (that) Julia will be loved.

Crēdēbam förě ŭt Jūlĭă ămārētŭr, I believed (that) Julia would be loved.

GERUND.-SUPINES.-PARTICIPLES.

§ 70. A. The Gerund is perhaps the Neuter Gerundive Participle declined as a Verb-Noun (um, \overline{i} , \overline{o}).

B. The Supines are Cases (Accusative and Ablative) of a Verb-Noun of the Fourth Declension.

C. The Gerundive (ŭs, ă, um, like bŏnŭs) is used to express meetness or necessity, either impersonally, as, ĕundum est, one must go; or personally, as, vītă tŭendă est, life should be protected. If a Case of the Person is added, that Case is usually the Dative: as, ĕundum est mĭhĭ, I must go; vītă nōbīs tŭendă est, life should be protected by us.

D. The other Participles are --

Active. Pres. ămans, loving, like ingens.

Fut. ămātūrŭs, *about to love*, Passive. Perf. ămātŭs, *loved*,

The three Participles wanting may be thus supplied:

Act. Part. Perf. ' having loved,' quum ămāvisset (or by § 125.)

Pass. Part. Pres. 'being loved,' qui ămâtŭr, or dum ămâtŭr.

" Part. Fut. 'about to be loved,' quī ămābitur.

E. Some Verbs form Participials in bundŭs or cundŭs, expressing 'fulness,' as, vägābundūs, wandering, īrācundūs, wrathful; in bilīs, expressing 'possibility,' as, părābilīs, procurable; in ilīs, expressing 'capacity,' as, dŏcīlīs, teachable; in ax, expressing 'inclination,' as, lŏquax, talkatīve; in idūs, expressing 'active force,' as, răpīdūs, hurrying, cūpīdūs, desirous.

DERIVED VERBS.

§ 71. I. Frequentative Verbs express repeated action, are of the First Conjugation, and formed either in -tō, -sō, from Supine-stems: as, cantō, I sing often (cănō, cantum), cursō, Irun often (currō, cursum); or by adding -š-tō, -š-tŏr to the Clipt Stem, as, rŏgǐtō, I ask often (rŏgō).

II. Inceptive Verbs express beginning of action, are of the Third Conjugation, and formed by adding -sco to the Present-stem : as,

| Lăbascō, | I begin to totter, | from lăbārĕ. |
|-----------|--------------------|--------------|
| Pallescō, | I turn pale, | " pallērĕ. |

Or from Nouns, with suffix -a-sco or -e-sco; as,

| Pŭĕrascō, | I become a boy, | from pŭěr. |
|-----------|-----------------|------------|
| Mītescō, | I become mild, | " mītis. |

III. Desiderative Verbs express the desire of action, are of the Fourth Conjugation, and formed by adding $-\check{u}r\check{r}\check{o}$ to the Supine-stem as,

| Ēsŭrĭō, | I am hungry, | from ĕdō, ēs-um. |
|-----------|-----------------|--------------------|
| Partŭriō, | I am in labour, | ,, păriō, part-um. |

QUASI-PASSIVE AND SEMI-DEPONENT VERBS.

§ 72. The Verbs which unite an Active form with a Passive meaning are:

| Exŭlō, I am banished (ārĕ). | Vāpŭlō, I am beaten (ārĕ). |
|-----------------------------|----------------------------|
| Fiō, I am made. | Vēnĕŏ, I am on sale (īrĕ). |
| Liceo, I am put to auction. | |

§ 73. The Verbs which have an Active Present with a Perfect of Passive form, are:

| Audeo, I dare, | Perf. ausus sum, I dared. |
|--------------------|-----------------------------|
| Fīdō, I trust, | " fīsŭs sum, I trusted. |
| Gauděō, I am glad, | " gāvīsŭs sum, I was glad. |
| Sŏlěō, I am wont, | ,, sŏlītūs sum, I was wont. |

Some have Active Perfect with Deponent Perfect Participles: as,

| Present. | Perfect. | Part. Perf. |
|-----------------|------------------|-------------------------|
| Jūrō, I swear | jūrāvī, I swore | jūrātŭs, having svorn. |
| Cēnō, I sup | cēnāvī, I supped | cēnātus, having supped. |
| Pranděō, I dine | prandī, I dined | pransus, having dined. |

So nuptă, wedded, potus, having drunk, and some others.

DEFECTIVE VERBS.

DEFECTIVE VERBS.

Defective Verbs want some of the usual parts of a Verb. § 74. I. The Verbs coepī, *I have begun*, ōdī, *I hate*, měmĭnī, *I remember*, have no Present-stem Tenses.

| | SCHEME. | | | |

| Coep- |) ī | ĕrim | issĕ | Perf. |

Měmínī has Imperative Fut. Sing. měmentō; Plur. měmentōtě. Coepī has Part. Perf. coeptŭs; Fut. coeptūrūs. Ōdī ,, ,, ōsūs ,, ōsūrŭs. a. Nōvī, *I know* (from noscō), is similarly used.

II. Many Verbs have Perfect without Supine (see Table), and many Inceptive and other Verbs have neither Perfect nor Supine : as, mītescō, pollēō, fŭrō, fěrĭō.

III. Verbs Defective in other forms:

(1) Aio, I say 'ay,' affirm.

reason of Mood is independent of Conjunctions; but Conjunctions distinguish the relations of Clauses more fully, as Prepositions distinguish the relations of Nouns.

IV. NUMERALS, MONEY, TIME.

A. NUMERALS.

a. The Cardinal Numbers are those on which the other Numerals hinge (cardo, hinge). Unus is used in the Plural with Substantives 'Plural only': as, una castra, one camp. But for higher numbers the Distributives are used : as, bina castra, two camps.

b. Ordinal Numerals denote numerical rank (ordo): primus, first. &c.

c. Distributive Numerals denote so many each or at each time: as, Sexageni caedunt singulos, sixty men beat each (centurion) .- TAC. Poets often use them for the Cardinal Numbers.

d. Numeral Adverbs denote the number of times that anything happens or is done: semel, once; bis, twice; &c.

- 4 Aliquoties, several times
 - soever
- 5 a. Quotiescumque, how often

NUMERALS.

e. The General Rules for writing Compound Numbers, Cardinal, Ordinal, and Distributive, are as follows :---

(1) In Compound Numbers less than 20, either the smaller number without *et* precedes the larger, or the larger with *et* precedes the smaller: as, Nos Tyndaritani in septem degim populis Siciliae numeramur, we of Tyndaris are reckoned among the 17 nations of Sicily.—Ctc. Roscius fundos decem et tres reliquit, Roscius left 13 farms.—Ctc. Licet dicere decimus et septimus pro septimus decimus.—PRISC.

(2) In Compound Numbers above 20, either the smaller number with *et* comes first, or the larger without *et*: as, Romulus septem et triginta regnavit annos, *Romulus reigned 37 years*.—CIC. Dentes triceni bini viris attribuuntur, *to men are assigned 32 teeth*.—PLIN.

(3) In Compound Numbers above 100, the larger with or without *et* generally precedes the smaller: as, Leontinus Gorgias centum et septem complevit annos, *Gorgias of Leontini completed* 107 *years*.—CIC. Olympiade centesimā quartā-decimā Lysippus fuit, *Lysippus lived in the* 114*th Olympiad*.—PLIN.

(4) The thousands are expressed either by prefixing the numerical Adverbs *bis, ter,* &c., to mille (chiefly in poetry), or by prefixing the Cardinal Numbers to millia. as, duo millia, tria millia, &c.

Millia is generally followed by a Genitive: but if smaller numbers intervene between millia and the Substantive, the latter will often stand in the same case as the Numeral: as, Tria millia et septingenti pedites ierunt, 3700 *infantry marched.*—Liv.

(5) The Numbers above 100,000 are expressed by the Numeral Adverbs joined to centum millia or centena millia, as stated in the following passage: Non erat apud antiquos numerus ultra centum millia; itaque et hodie multiplicantur haec, ut decies centena millia aŭt saepius dicantur.—PLN.

f. Unus is often used in Compound Numbers for primus.

g. The Numbers compounded with 8 and 9 are commonly expressed by a subtraction of duo and unus from the next multiple of 10: as, duodeviginti (duodevicesimus), 18; undeviginti (undevicesimus), 19; duodetriginta (duodetricesimus), 28; undetriginta (undetricesimus), 29; &c., &c.: duodecentum (duodecentesimus), 98; undecentum (undecentesimus), 99.

Asses usurae = 1 per cent. per month = 12 per cent. per annum. Asses usurae were also called centesimae; and binae centesimae = 2

per cent. per month = 24 per cent., &c. Unciarium fenus was 1 uncia yearly per as = $8\frac{1}{3}$ per cent. per annum.

| c. Heres ex | asse . | means | heir to | the whol | e estate | è. |

d. The Sestertius (Numus), or Sesterce, was a silver coin equal to $2\frac{1}{2}$ asses, being $\frac{1}{4}$ of the Denarius (coin of 10 asses). Its symbol is HS.

The Sestertium (=1000 sestertii) was not a coin, but a sum, and is only used in the Plural Number.

Šestertia, in the Plural (also represented by HS.) joined with the Cardinal or Distributive Numbers, denotes so many 1000 numi sestertii.

The Numeral Adverbs, joined with (or understanding) sestertii (Gen. Sing.), sestertium numum, or HS., denote so many 100,000 numi sestertii:

Thus HS.X = Sestertii decem, 10 sesterces.

 $HS.\overline{X} = Sestertia$ decem, 10,000 sesterces.

HS.X = Sestertium decies, 1,000,000 sesterces.

C. TIME.-THE ROMAN CALENDAR.

Every Roman month had three chief days: Kalendae (Calends), Nonae (Nones), Idus (Ides). The Calends were always the 1st day of

TIME.

the month; the Nones were usually on the 5th; the Ides on the 13th; but in four months the Nones were on the 7th, the Ides on the 15th.

March, May, July, October; these are they Make Nones the 7th, Ides the 15th day.

These three days, the Calends, Nones, and Ides, were taken as points, from which the other days were counted backwards. That is, the Romans did not say, such and such a day *after*, &c., but such and such a day *before* the Calends, or Nones, or Ides. The rules are: (1) For days before the Calends subtract the day of the month from the number of days in the month increased by two; (2) For days before the Nones or Ides subtract from the day on which they fall, increased by one.

Note.—A Roman of distinction had at least three names: the Praenomen, individual name; the Nomen, name showing the Gens or clan; and the Cognomen, surname showing the Familia or family. Thus, Lucius Junius Brutus expressed Lucius of the Gens Junia and Familia Brutorum. To these were sometimes added one or more Agnomina, titles either of honour (as Africanus, Macedonicus, Magnus, &c.), or expressing that a person had been adopted from another Gens, as Aemilianus, applied to the younger Scipio. Africanus, who was the son of L. Paulus Aemilius, but adopted by a Scipio. The full name of the emperor Angustus (originally an Octavius) after he had been adopted by his uncle's will and adorned by the Senate with a title of honour, was Gaius Julius Caesar Octavianus Augustus.

II. NOTES ON SYNTAX.

I. AGREEMENT. § 88-92. § 156-160.

A. The Subject (§ 88) may be any Noun-term, § 87.

B. (1) The term Adjective (§ 89) includes Participles and Adjectival Pronouns.

(2) An Adjective agrees as Epithet with a Substantive: as Complement with any Noun-term.

. (3) Adjectives are used as Substantives (§ 156): 1. In the Masc. Sing. and Pl., man or men being implied: as, amicus, a friend; sapiens, a wise man; stultus, a fool; boni, good men; multi, many; plerique, most. 2. In the Neut. Sing. abstractly: as, Honestum et utile, morality and expediency.—Crc. Triste lupus stabulis, the wolf is a bane to the stalls.—VIRG. 3. In the Neut. Pl., things being implied: as, multa, many things; omnia, all things. AGREEMENT.

C. The term Substantive (§ 90) includes all Noun-terms. A Substantive may be in Apposition to any Noun-term, as Appositive Epithet or Complement. An Apposite usually agrees in Number also with its Noun, sometimes in Gender: as, Usus magister egregius.—PLIN. Vita rustica parsimoniae magistra est.—CIO.

D. 1. The Relative (§ 91) may refer to any Noun-term of any Person, as ego, nos, tu, vos, &c. 2. It may be explained as standing between two Noun-terms, with the former of which it agrees in Gender, Number, and Person, with the latter in Case: as,

- (1) Vir quem virum vides rex est (Full Form).
- (2) Vir quem vides rex est (Usual Form).
- (3) ... quem virum vides rex est.
- (4) \dots quem \dots vides rex est.

E. Figures varying Agreement (§ 158-160) are :-

1. Ellipsis, which omits words: (1) Pronouns, as Aiunt, they say: (2) Substantives, as Falernum, Falernian (vinum, wine), gelida (aqua) cold water; Ad Junonis, to Juno's (templum, temple). (3) Verbs, especially the Copula est, sunt. See § 158.

The opposite of Ellipsis is Emphasis, which throws stress on words : as, Ego reges ejeci, vos tyrannos introducitis, *I expelled kings, ye are bringing in tyrants.*—Liv.

2. Attraction, which removes Agreement from the usual word to some other: as, Amantium irae amoris integratio est, the quarrels of lovers are the renewal of love.—TER.; where est agrees with the Complement integratio, not with the Subject irae.

3. Synesis, which occurs when words have one Gender or Number in form, another in meaning, and when the construction is made to agree with the meaning: as, Capita conjurationis securi percussi sunt, the heads of the conspiracy were decapitated.—LIV. Pars epulis onerant mensas, part load the tables with viands.—VIRG. Singular Nouns with Plural sense, as pars, juventus, turba, multitudo, nobilitas, plebs, populus, civitas, vulgus, etc., are called Collectiva, Collective Nouns, or Nouns of Multitude.

F. 1. A Composite Subject (§ 92) is one which contains two or more Noun-terms. The rule holds good, whether the Nouns are linked by Conjunctions, or without Conjunctions (by Asyndeton), or united by the Preposition cum. So, Remo cum fratre Quirinus jura dabunt, *Quirinus* with his brother Remus will give laws.—VIRG.

2. A Singular Verb may be used with a Composite Subject when the Nouns form one notion : as, Senatus populusque intelligit.—Crc.

3. The Verb may agree with one of the Nouns, and be understood with the others : as, Convicta est Messalina et Silius, *Messalina was convicted*, and Silius.—TAC.

4. As the first Person is prior to the second, and the second to the third, so the Masculine Gender is held in Grammar superior to the Feminine. (1.2.)

G. Upon Impersonal Verbs, see § 157, also § 75, &c.

NOTES ON SYNTAX.

II. CASES OF SUBJECT AND COMPLEMENT. § 93-94.

A. It is commonly stated that 'Copulative Verbs, Finite or Infinite, have the same Case after as before them;' but this is true only of an Attributive or Appositive Complement. The Complement may be a Phrase in an Oblique Case with or without a Preposition, or it may be an Adverb, and then the rule here cited will fail. Rule § 93 (2) may be given for every Nominative Complement; and the use of the term Complement always implies that the Verb of the sentence in question is either esse or some other Copulative Verb, Finite or Infinite. See § 87 D. Rules § 94 refer to the important construction of Accusativeand-Infinitive in Enunciatio Obliqua, on which see X. (1).

B. The Verb sum may be completely Perturbed to the Copulative, if it denotes absolute existence: as, Jam see st, ubi Troja fuit, now corn is, where Troy was.—Ov.

III. THE ACCUSATIVE CASE. § 95-103.

A. When the Verb is Transitive (§ 96), the construction is often without sense until a word is added to express that on which the Verb acts. This is called the Object (or Nearer Object), and stands in the Accusative Case. Thus Romulus condidit, *Romulus founded*, is incomplete in sense until we add Romam, *Rome*. Transitive Verbs may be called Quid-Verbs. How to change a Transitive Active Sentence into Passive form, see XIV. E. 1.

B. (1) Transitive Verbs are sometimes used intransitively; as, Jam verterat fortuna, fortune had now turned.—Liv. (2) More often Intransitive Verbs become transitive: as, Flet necem fili, he weeps for his son's death. (3) The Compound of an Intransitive Verb is often transitive: as, Hostes urbem circumsedent, the enemies surround the city. (4) Passive Verbs used reflexively sometimes become transitive, like Deponents: as, Exuitur cornua, she puts off her horns.—Ov. Hence such constructions as Nodo sinus collecta fluentes, having gathered up in a knot her flowing folds.—Ving.

C. The Verbs which take double Accusative (thing and person) (§ 98) are doceo (and its compounds), rogo, interrogo, orc, exoro, posco, flagito, percontor, and, in Horace, lacesso. Sometimes celo, conceal. They may be called Quem-Quid Verbs. In Passive construction the Accusative of the thing remains: Quid tu docearis a me litteras? why should you be taught letters by me?

D. Factitive or Quid-Quale Verbs (Sector such as may be said to make (facere) a thing to be of a certain connacter, by deed, word, or thought: as, (1) facio, efficio, redde praesto, creo, lego, eligo, &c.; (2) dico, voco, memoro, praedico conno, nuncupo, declaro, usurpo, appello, saluto, &c.; (2) pestimor conno, nuncupo, declaro, usurpo, appello, habeo, censeo, agolosco, include, reperio, deprehendo, &c., &c. They are the Active forms of these which in the Passive are Copulative Verbs. In their construction esse may be mentally supplied between the Object and Complement. Factitive Construction in the Passive becomes Copulative : Fis dea a nobis, Fortuna : A Romulo urbs sua Roma vocata est. E. The Accusative of Respect or Nearer Definition (100) is seldom used in prose, except when it contains Pronominal or semi-adverbial xpressions: as, Illud doleo; Hoc laetor; Cetera assentior Crasso, n other things I agree with Crassus.—CIC.

F. (1) Many Grammarians deem the original force of the Accusative Dase to be, that it marks the limit or object of motion. 101. (2) The Prepositions in, ad, are generally used by prose writers, if motion to ther places than towns or small islands is mentioned.

IV. THE DATIVE CASE. § 104-109.

A. Words whose sense is incomplete without reference to a Recipient 105) are called Trajective. Thus carus, *dear*, necessarily implies, *dear* to some one; dare, to give, necessarily implies not only a thing given, but a person to whom it is given. Trajective words take a Dative of this bject of reference. Verbs of this sort, if they take a Dative only (as parco, faveo, irascor, &c.), are purely Trajective or Cui-Verbs: if they ake an Accusative also, they are Trajective-Transitive, or Cui-Quid Verbs, as do, narro, spondeo, &c.

B. The fundamental notion of the Dative (§ 106) seems to be Nearness, with its opposite Remoteness. The First Class, then, of Trajective words is composed of those which contain the ideas of *nearness* and *remoteness*, presence and absence, affinity and non-affinity, custom and strangeness, fitness and unfitness, likeness and unlikeness, agreement and disagreement, union and disunion, comparison and contrast. Next, showing and being shown is the bringing near or being brought near to the eye, ear, or (generally) to the mind. Herein we include the Second Class, words of utterance and silence, narration and concealment, affirmation and denial, evidence and obscurity, persuasion and dissuasion. We are hence led on to the Third Class, a large body of words which express application or exhibition with the attendant notion of favour or disfavour. These comprise words which express profit and harm, kindness and unkindness, bounty and stint, indulgence and grudging, helpand obstruction, pleasing and displeasing, pardon and resentment, flattery and reviling, blessing and malediction, compliance and resistance, promise and menace, gift, loan, present, payment, dedication, and re-fusal; delivery and withdrawal; faith and infidelity, trust and distrust, lawfulness and unlawfulness, ease and difficulty. There are yet a few words, which share something of the character of both the two lastmentioned classes, and may conveniently form a Fourth Class. These are words which express rule and subservience, command and obedience.

C. The reason why many Verbs compounded with Particles (106 a.) become Trajective, is, that the Particle confers upon them one or other of the notions enumerated above : most frequently that of Nearness.

D. The reason why a Dativus Commodi vel Incommodi (107) may be attached to almost any predication, is evidently because almost any action or state may be attended with something of *advantage* or *disadvantage* to some one; it may be for or *against* some one's interest; it may be in some way *interesting* to some one. Thus nubere means 'to take the bridal veil,' and a bride is said, 'nubere viro,' to take the veil for her husband,' that is, 'to marry him.' Vacare means 'to be void,' or 'empty:' hence, 'to be disengaged for,' that is, 'to have leisure for:' as, vacare philosophiae. Such constructions are far-fetched examples of the Trajectiva Gratiae. Here, too, may be ranked the Dativus Ethicus, the Dative with sum and its compounds, with Participles, Gerunds, &c. and perhaps the Dativus Rei pro Complemento.

E. Some Adjectives in the classes named prefer the construction of ad with Accusative to that of the Dative: such are natus, aptus, utilis, idoneus, paratus, rudis, &c. as, Ad laudem et ad decus nati sumus, we are born to praise and glory.—Cic. Others use in, erga, adversus : as, Acer in hostem, spirited against the foe.—Virg. Benignus erga te fui, I was kind towards you.—PLAUT. Communis, proprius, affinis, similis, par, and some other Adjectives, take a Dative or a Genitive Case.

F. Some Verbs belonging in sense to the classes named above (B) are Quid-Verbs, not Cui-Verbs, and take Accusative and not Dative: as, juvo, jubeo, laedo, rego, guberno. Multos castra juvant, the camp delights many. Animum rege, rule the temper.—Hor. Others use Dative or Accusative: as, tempero, moderor. The construction of Verbs varies considerably, owing to the use of Prepositions and other causes. Thus we find donare alicui munus and donare aliquem munere, invidere alicui, invidere re aliquem. These varieties must be observed in reading.

G. The English Prepositions chiefly used in rendering the Latin Dative are to and for. But after some Adjectives and Verbs (iratus, succenseo, &c.) with must be used; after some Verbs (disto, aufero, &c.), from; after many Compound Verbs, upon, into, or against. Others, as parco, placeo, displiceo, medeor, &c., are rendered without introducing an English Preposition.

H. The Dative after a Finite Passive Verb is rare: as, Non intelligor ulli, I am not understood by anybody.—Ov. So is the Dative after a Verb of motion: as, It clamor caelo, a cry ascends to heaven.—VIRG.

V. THE ABLATIVE CASE. § 110-125.

A. When the Ablative stands without a Latin Preposition, it is rendered with the help of various English Prepositions; namely, I. Cause, by, for, from, through, with, at. II. Instrument, with, by. III. Manner: in, with, by. IV. Condition: with, in, upon. V. Quality: of, with. VI. Respect, in, by, with. VII. Value or Price: at, for, of, with. VIII. Measure: by, or no Preposition. IX. Matter: of, in, with, from, upon, for, or no Preposition. X. Time: at, in, within, or no Preposition. XI. A. Place by which: by, along, upon, through. B. Place where: at, in, upon (humi). G. Place from which: from. XII. (See Prepositions). XIII. Separation and Origin: from, of. XIV. Thing compared: than.

B. The use of the Simple Ablative in most of these meanings is varied considerably by the introduction of Latin Prepositions. Thus Cause may be expressed by ab, de, ex, prae; also by ob, per, propter, with Accusative. Agent requires a, ab; while Instrument is without Preposition. Manner without an Epithet requires 'cum,' (except in a few phrases, such as, vi, fraude, jure, injuriā, ritu, silentio, arte, ordine, &c.). Thus, I speak with grief, or he writes with diligence, cannot be rendered dolore loquor, diligentiā scribit, but cum dolore loquor (or dolens loquor), cum diligentiā scribit (or diligenter scribit). If an Epithet is joined to this Ablative, the Preposition is often used, often omitted; and observation must determine the choice of construction : as, Cato summā contentione dixit, *Cato spoke with the utmost energy.*—CIC. Magnā cum curā atque diligentiā scripsit, *he wrote with great care and diligence.*—CIC.

C. The Case of Quality, whether Ablative or Genitive, requires an Epithet.

D. The Ablative of Price is used with Verbs and Adjectives implying sale, purchase, dearness, cheapness, cost, &cc. Muto, I change, may have Accusative of what is left, and Ablative of what is taken, or (in poetry) the converse. Thus mutare urbem exilio, and mutare urbe exilium may equally mean 'to quit the city and go into banishment.' Pretio is often dropt: as, magno, dear; parvo, vili, cheap.

E. The Ablative of Measure defines Verbs and Adjectives of Extent and Degree, especially Comparative and Superlative Words: and for this purpose in particular are used the Pronominal Ablatives hoc, eo, quo, altero, tanto, quanto, aliquanto: also paulo, multo, duplo, dimidio, nihilo, nimio, &c.: as, Quo plus habent, eo plus cupiunt, the more they have, the more they desire.

F. The use of Prepositions in defining Time (§ 120) is frequent: as, Sol binas in singulis annis reversiones facit, the sun makes two turns in each year.—Crc. De die, before the close of day. De nocte, before the close of night. De multā nocte, long before the close of night. Sub vesperum, on the approach of evening. Diem ex die expecto, I wait day after day. In is usually prefixed to an Ablative of time when a numeral Adverb is annexed: as, Quidam oves in anno bis tondent, some shear sheep twice a year.—VARR.

G. 1. Generally Place where (§ 121 B.) is expressed with in: as, In portu navigo, I am sailing in harbour.—SEX. In is omitted in certain phrases: as, loco (in the stead), multis locis, pluribus locis, &c.; hoc libro, alio libro, &c.; terrā marique; or where totus is used: as, totā Asiā, in all Asia, dextrā (parte), on the right hand, laevā, sinistrā, on the left hand. The poets are more free in the omission: as, Silvisque agrisque viisque corpora foeda jacent, in forests and fields and roads, lie revolting corpses.—Ov. But this licence needs discrimination. When a work is quoted in is used: as, in Iliade Homeri; in Andriā Terentii; in Gorgiā Platonis; but when the author only is eited, apud; apud Homerum; apud Terentium; apud Platonem (in Homer, &c.).

2. That the seeming Genitive, Romae, Corinthi, &c., $(\S 121 \text{ B. }a.)$ is not strictly such, was perceived by ancient Grammarians, who call it an Adverb. But if we notice that it ends in *i*, Romai (Romae), militiai (militiae) Mileti, domi, humi, belli; and compare the old forms of place in the Third Declension ending in *i*, ruri, Lacedaemoni—NEP.; Carthagini—Liv.; Tiburi—Cic., &c.; we cannot doubt the original existence in the Latin language, as in the Sanskrit, of a Locative Case ending in *i* Singular, in *s* Plural.

3. Prepositions are much used with names of towns: as, In Epheso est. In Ephesum abii. Ex Epheso huc litteras misi, *I sent a letter to* this place from Ephesus.—PLAUT. Has litteras a Brundisio dedit, this letter he dated from Brundisium.—CIC. H. The usage of Verbs and Participles of Separation and Origin (§ 123) must be carefully observed, some of them taking or omitting the Preposition in prose: as, areco, cedo, moveo, pello, prohibeo, summoveo, removeo: others requiring a Preposition in prose, but not in poetry; as, alieno, discedo, disjungo, dispello, disto, divello, repello, reporto, rejicio, segrego, secerno, separo, &c. The chief Participles are natus, prognatus, satus, cretus, creatus, editus, oriundus, &c.

K. 1. The Case of the word with which the Ablative is compared (§124) is much oftener a Nominative than an Accusative. In comparison with other cases quam must be used: as, Nulli flebilior quam tibi, Vergili, to none more a cause of weeping than to thee, Vergilius.— Hore. Flagiti magis nos pudet quam erroris, we are more ashamed of the crime than of the blunder.—Cic. And, in general, for the sake of perspicuity: as, Segnius homines bona quam mala sentiunt, men feel blessings less keenly than evils.—Liv.

2. After plus, amplius, minus, an ellipse of quam often occurs before Numerals: as, Romani paulo plus sexcenti ceciderunt, of the Romans rather more than 600 fell.—Liv. Unus is omitted: as, Quinctius tecum plus annum vixit, Quinctius lived with you more than a year.—Cic.

L. 1. The Ablative Absolute (§ 125) being an abridged Clause, the Participle may often be transformed into a Finite Verb with Conjunction. Thus, in the example, Regibus exact = postquam reges exact is sunt.

2. A common instance of Substantive put Absolutely with Substantive is that of consule or consulibus: as, Caninio consule scito neminem prandisse, in the consulship of Caninius you must know that nobody dined.—CIC.

VI. THE GENITIVE CASE. § 126-136.

A. 1. The Genitive is Subjective when it limits a Noun like an Attribute; Objective when it limits it like an Object. It is the same thing to say, Sullanus exercitus, or Sullae exercitus, the army of Sulla; famen Martialis, or flamen Martis, the priest of Mars; on the other hand, cupido pecuniae is nearly the same as cupere pecuniam. But Adjectives are even used for the Objective Genitive: as, bellum regium for bellum contra regem; timor externus for timor exterorum. So the Possessive Pronouns; as, Desiderium vestrum ferre non possum, I cannot bear the want of you...Cic. 'Native of a place' is expressed by an Adjective derived from the place: as, Dionysius Halicarnass.

2. The Possessive Genitive is rendered in English either by of or the Genitive in 's: as, Philippi filius, 'son of Philip,' or 'Philip's son.'

3. Instar (an undeclined Substantive meaning *likeness*) stands (with a Genitive) in apposition to a Substantive: as, Instar montis equum, a horse resembling a mountain.—VIRG.

B. (1) Some suppose interest to be for inter rem est, refert for rem fert, and mea, &c., to be corruptions of meam, &c. (§ 129). (2) These Verbs may be qualified by the Genitives of Value, magni, parvi, pluris, tanti, quanti: as, Utriusque nostrum magni interest ut te videam, it is of great importance to both of us that I see you.—Cic. C. 1. The Genitivus Rei Distributae (§ 130) and Genitivus Rei Denensae (§ 131) are so far the same, as that each is a divided whole; at the former is numerically or quotatively divided, the latter quantiatively: the former is Plural unless it be a Collective Noun; the atter usually, but not always, Singular. The Partitive words which listribute the former Genitive are (α) Pronominals: as, alius, alter, iter, uterque, utervis, uterlibet, ullus, nullus, nemo, plerique, multi, auci, eeteri, reliqui, solus, qui, quis, quicumque, quisquis, quisque, unusnuisque, tot, quot, queteumque, quotusquisque, quisnam, quisquam, aliquis, quidam, quispiam, &c. (β) Numerals, Cardinal and Ordinal: mus, primus: duo, secundus, &c.; also princeps, medius. (γ) Comparative and Superlative Adjectives; the former distributing two things: is, Major Neronum; or one class into two parts: as, Avium loquaciores, the noisier sort of birds.—PLIN. Also Superlative Adverbs, in which Gender cannot appear. (δ) Any Adjective, Participle, or Substantive which can imply a distributive meaning: as, Sancte deorum; lecti uvenum; pissium feminae.

2. Partitives are sometimes attracted in Gender from the Genitive to the Subject: as, Indus est omnium fluminum maximus, the Indus is the largest of all rivers.—CIC. Or varied by Synesis: as Dulcissime rerum, dearest of beings.—Hor.

3. A Collective Noun is distributed: as, Plato totius Graeciae doctissimus fuit, Plato was the most learned man of all Greece.— Crc.

4. This Genitive forms a Complement: as, Fies nobilium tu quoque fontium, thou too shalt become one of the renowned fountains.-Hon.

5. Adverbs of Place, ubi, quo, eo, nusquam, &c. are Partitively used with the Genitives gentium, locorum, terrarum, &c. : as, Nusquam gentium, nowhere in the world.—Liv.

6. Primus, ultimus, summus, imus, extremus, and other like Adjectives are used as Epithets with Partitive force: as, Primā luce summus mons a Labieno tenebatur, at break of day the top of the mountain was occupied by Labienus.—CAES.

D. Among Quantitative words governing a Genitive (§ 131) are, nihil, satis, affatim, abunde, nimis, partim, minus, minimum, parum, aliud, id, illud, hoc, idem, quod, quid, aliquid, quidquad, quidquam, multum, plus, plurimum, tantum, quantum, aliquantum, nimium, dimidium. They are usually rendered in English as agreeing with the thing measured: as, nimium pecuniae (too much money); nihil mali (no evil). They may also be followed by the Genitive of an Adjective of the Second Declension; but an Adjective of the Third is commonly put in the same Case with the word of Quantity: as, Ne quid falsi dicere audeas, ne quid veri non audeas, you should dare to say nothing false, nothing true not dare to say.—Ctc. Nee viget quicquam simile aut secundum, and nothing exists like or in second rank.—Hor.

E. Among poetic Genitives (§ 135) are these: (1) Cause: as, Laudabat leti juvenem, he praised the young man for his death. (2) Respect: as, O seri studiorum, O late in your studies. (3) Dominion: as, Daunus agrestium regnavit populorum, Daunus ruled over rustic tribes, &c.

NOTES ON SYNTAX.

VII. THE VERB INFINITE. §140-144.

A. The Infinitive used in direct predication (\S 140, 2.) is called the It appears in poetry as well as in prose narrative, Historic Infinitive. (a) in passages descriptive of strong emotion; (b) where various actions take place simultaneously or in immediate sequence; (c) in actions interrupted, and from time to time repeated. It is analogous to the ellipse of the Copula; in fact, both constructions occur together: as, Ceterum facies totius negoti varia, incerta, foeda atque miserabilis; dispersi a suis pars cedere, alii insequi: neque signa neque ordines observare: ubi quemque periculum ceperat, ibi resistere ac propulsare; arma, tela, equi, viri, hostes, cives permixti; nihil consilio neque imperio agi; fors omnia regere, now the aspect of the whole affair was confused, indecisive, shocking, and pitiable. Parties scattered from their comrades were some retiring, others advancing; observing neither standards nor ranks; where peril encountered each man, there was he resisting and repelling ; arms, darts, steeds, men, foes, countrymen were intermingled; nothing was proceeding by counsel or command; This Infinitive is not Present, but Imchance directed all.—SALL. perfect.

B. 1. The Infinitive is called Prolative when it carries on the construction of Verbs which express ability, desire, custom, beginning, ceasing, seeming, being thought, being said, &c.; as, possum, queo, nequeo, debeo, volo, nolo, malo, aveo, cupio, gestio, amo, soleo, coepi, incipio, statuo, pergo, conor, meditor, paro, cesso, desino, videor, putor, credor, feror, dicor, trador, memoror, &c. Among these Verbs, those which are Copulative (videor, credor, existimor, putor, dicor, narror, feror, trador, reperior, arguor, &c.) are used personally with a Prolative Infinitive rather than impersonally with Accusative and Infinitive. Thus it is better Latin to say, Videtur errasse Cicero, than Videtur errasse Ciceronem; Dicitur H ome r us caecus fuisse, than Dicitur Homerum caecum fuisse. The Participle Passive is often found in poetry after such Verbs with an ellipse of esse: as Fertur Prometheus coactus, &c., Prometheus is said to have been compelled, &c.—Hor. The law of this construction should be carefully observed.

2. The construction of a Prolative Infinitive with Adjectives abounds in poetry, especially lyric; as, Audax omnia perpeti, *bold to endure all things.*—Hor. Fruges consumere nati, *born to consume the fruits.*—Hor. In the best prose it is used but with few words; as, Paratus, assuetus, &c.; but Tacitus adopts it freely.

C. Under the Dative Gerund (§ 141, 3.) note the phrase, non esse solvendo, to be insolvent; and the use of the Dative Gerund and Gerundive in describing functions of office; as, Triumviri agro dando, triumvirs for assigning land, &c.

D. The Transitive Gerund is not always attracted (§ 143): as, Efferor studio patres vestros videndi, I am rapt with the desire of seeing your sires.—Cro. Especially when a Neuter Pronoun or Adjective is the Object: as, Pars honesti versatur in tribuendo suum cuique, one branch of morality lies in giving each his own.—Cro. Parva non contemnendo majores nostri maximam hanc rem fecerunt, by not despising small things our ancestors made this commonwealth very great.—Liv. But, as a general rule, the Gerundive attraction is used.

REFLEXIVE PRONOUNS.

VIII. THE REFLEXIVE PRONOUNS. § 145.

A. Personal and Possessive Pronouns of the First and Second Perns may be used reflexively; that is, they may be referred to a Subject f their own Person. But se and suus differ from the rest, inasmuch as hey cannot be used unless there be a Noun of their own (the Third) 'erson, expressed or understood, to which they are referred. Although ce can say amat me, he loves me; amat te, he loves thee; we cannot say, mo se, amas se, but amo e um, I love him; amas eum, thou lovest him; ot culpo suum factum, but culpo ejus factum, I blane his deed.

B. The reference of se or suus to the Object is not ambiguous (a) if he Pronoun is an adjunct to the Subject as in the first and third exmples under § 145, a.; (b) if the Subject is not of the Third Person, is in the second example; (c) if the context shows that the Pronoun annot be referred to the Grammatical Subject: as, Scipio suas res Byracusanis restituit, Scipio restored to the Syracusans their property.—Liv. To suppose that Scipio restored his own property to the Byracusans would be absurd. The Object to which se, suus, are reerred, usually precedes: except the Distributive Pronoun quisque, which, if so used, generally follows them. So, Sui cuique mores fingunt fortunam, his own character moulds each man's fortune.—NFE. When se, suus, would be improper, in some places is used the Pronoun is, in others the Pronoun ipse: as, Chilius te rogat, et ego ejus rogatu, *Chilius requests you and I at his request.*—Cic. Caesar milites inreproachfully asked his troops why they despaired of their own valour and of his carefulness.—CAES.

IX. THE CONJUNCTIVE MOOD. § 148.

The Indicative Mood states absolutely, the Conjunctive contingently. The Conjunctive is called *pure* when it is in the predication of a principal Sentence. Its *pure* uses are various :

| (1) Potential: | as, | Ita amicos pares, thus you may get friends. |
|------------------|-----|--|
| | | Dixerit aliquis, some one may say. |
| (2) Conditional: | " | Velim tecum esse, I should wish to be with you. |
| | | Crederes victos, you would have supposed them vanquished. |
| (3) Concessive: | ,, | Age dicat, well, he may speak. |
| • / | | Fuerit sapiens, suppose he were wise. |
| (4) Optative: | ••• | Valeant cives mei, may my countrymen flourish! |
| | | Ne vivam si, &c., may I not live if, &c. |
| (5) Dubitative: | | Faveas tu hosti? must you favor a foe? |
| () | | Quid faciam? what am I to do? |
| (6) Hortative: | | Imitemur bonos, Let us imitate the good. |
| (0) Hortaarro. | ,, | Rem tuam curares, you should have been minding your own business. |
| | | |

X. SUBSTANTIVAL CLAUSES, AND DEPENDENCE ON ORATIO OBLIQUA. § 149-151.

I. Every Simple Sentence is either (1) a Statement (Enunc a (2) a Command or Request (Petitio), or (3) a Question rogatio). As (1) Psittacus loquitur, the part of speaks. (2) Loquere,

NOTES ON SYNTAX.

psittace, speak, parrot. (3) Loquiturne psittacus? does the parrot speak? When any of these is a Principal Sentence, it is said to be Direct (Recta Oratio); when it is a dependent Substantival Clause, it is said to be Oblique (Obliqua Oratio).

it is said to be Oblique (Obliqua Oratio). A Substantival Clause is one which may take the place of a Substantive (as Subject, Object, or Apposite), being (1) Oblique Enunciation, (2) Oblique Petition, (3) Oblique Interrogation.

(1) The principal form which Oblique Enunciation takes is the Accusative and Infinitive (§ 94.), which is either Subject of the Copula est or an Impersonal Verb, or Object of one of the Verba Sentiendi et Declarandi. Grammatical writers sometimes have this construction alone in view when they use the term Oblique Oration : but incorrectly; for it is but one, though the most important, form of Oblique Oration. As, Facinus est vinciri civem Romanum, it is a crime for a Roman citizen to be put in chains.—CIC. Thales dixit aquam esse initium rerum, Thales said that water is the origin of the universe.—CIC.

Constructions used for the Accusative and Infinitive are:

a. Ut, with Subjunctive, in Oblique Enunciation, implies consequence, expediency, duty, necessity, custom, law, &c. Quod, with Indicative (usually), implies fact: as,

Mea refert ut venias, It is important to me that you come.

Necesse est (ut) venias, You must needs come. Oportet (ut) venias, You ought to come.

Expedit) at circitator and imp hele

Utile est } ut civitates sua jura habeant.

It is expedient (useful) that the states have their rights.

Gaudemus Gratum est } quod civitates sua jura habent.

We are glad that the states have their rights.

b. Verbs of *hoping* and *promising* prefer the Accusative with Future Infinitive: as,

Spero te venturum (esse), I hope that you will come.

Pollicetur se venturum (esse), he promises that he will come.

- c. After expressions of *fearing*, *danger*, &c., ne means *lest*, ut *lest* not: as,
 - Metuo ne redeat, I fear lest he return (=I fear he will return).

Metuo ut redeat, I fear lest he return not (=I fear he will not return).

d. Interrogatio Infinitiva (or Accusative and Infinitive interrogatively used with ellipse of Finite Verb) asks an indignant question: as,

Mene incepto desistere? What, I abandon my design?

(2) Oblique Petition is formed when ut, ne, depend on Verbs of entreating, commanding, forbidding, allowing, persuading, caring, endeavouring, effecting, preventing, &c. : as, Oro ut venias; Cura ut valeas: Vide ne facias; Enitendum est ut vincamus, ne vincamus, &c. Fieri non potest ut veniam, I cannot possibly come. Ut and ne are often omitted: as, Precor reddas; fac venias; cave dicas; licet abeas, &c.

142

(3) Oblique Interrogation is formed by Interrogatives dependent on Verbs of *stating*, *enquiring*, &c. § 149. Here too an Interrogative sometimes falls out: as, Interrogatur, tria pauca sint anne multa, *It* is questioned whether three things are few or many.—CIC.

II. A Clause dependent on Oblique Oration may be called Suboblique (Subobliqua). A Clause is virtually Suboblique (Subobliquae potestatis), if it depends on Oratio Reeta so constituted as to be virtually Oblique, that is, containing the statement of somebody's thought, judgment, or declaration. Thus, in the Compound Sentence, 'Laudat Africanum Panaetius, quod fuerit abstinens,' the Principal Sentence, Laudat, &c., is virtually Oblique, and the Clause, quod, &c., virtually Suboblique: the sense being *Panaetius* praises Africanus (=says Africanus is to be praised) because he was self-denying. Hence fuerit is Subjunctive, although the Conjunction quod is one of the Second Class, to which the Indicative is appropriate.

XI. ADVERBIAL CLAUSES.

A. An Adverbial Clause modifies the Principal Sentence like an Adverb, and is introduced by Conjunctions (1) Consecutive, (2) Final, (3) Causal, (4) Temporal, (5) Conditional, (6) Concessive, (7) Comparative. Lists of these Conjunctions appear §152.

Examples of Subjunctive in Adverbial Clauses:

- (1) Non tam amens est ut eat, He is not so mad as to go.
 - Non ita amens fuit ut iret, He was not so mad as to go.
 - Adeo prudens est ut non ierit, He is so prudent that he went not.
 - Tam catus erat ut nihil diceret, He was so shrewd as to say nothing.
 - Tam catus fuit ut nihil dixerit, He was so shrewd that he said nothing.
 - Tantum abest ut Romae sit, ut in Britanniam ierit, He is so far from being at Rome, that he has gone to Britain.
 - Tantum abfuit ut Romae esset, ut in Britanniam ivisset, He was so far from being at Rome, that he had gone to Britain.
- (2) Edo ut vivam, I eat that I may live. Vivebant ut ederent, They lived that they might eat. Obedi rationi ne servias appetitui, obey reason, that you may not be a slave to appetite.
- (3) Quae cum ita sint, ibo, Since this is the case, I will go. Quae cum ita essent, ivi, Since this was the case, I went.
- (4) Expecta dum veniam, Wait till I come. Expectabam dum venirent, I was waiting till they came.
- (5) Oderint dum metuant, Let them hate provided they fear.
- (6) Ut peccet, carus est, Though he sin, he is dear. Quamvis peccasset, carus erat, Though he had sinned, he was dear.
- (7) Obtundis tanquam surdus sim, You stun me as if I was deaf. Obtundebas quasi surdus essem, You stunned me as though I were deaf.

B. Conditional Sentences require special notice.

A Conditional Sentence (si, if; nisi, unless) contains a Protasis or Conditional Clause, and an Apodosis (Statement or Principal Sentence): as, If you like (Protasis), you shall go (Apodosis).

Its main forms in Latin are these :

| 1. Si peccas doles, | |
|---------------------|--|
|---------------------|--|

- If you sin you grieve.
- Si peccabis dolebis,
- If you sin you will grieve.

II. Si pecces doleas, If you were to sin now, you would grieve; or, If you shall sin, you will grieve.

III. Si peccares, doleres, Were you to sin, you would grieve.

Si peccasses, doluisses, If you had sinned, you would have grieved.

Si peccasses, doleres, If you had sinned, you would) (now) be grieving.

Here both Verbs are Indicative, and no suggestion is made of probability or improbability (Sumptio Dati).

Here both Verbs are Conjunctive Present, and there is a suggestion of probability (Sumptio Dandi).

Here both Verbs are Conjunctive, either Imperfect or Pluperfect; and an imaginary case is sug-gested, which has not actually occurred (Sumptio Ficti).

In Oblique Oration these Sentences become :

I. II. Aio te, si pecces, { dolere (for doles). doliturum esse.

III. Aiebam te, si peccares, doliturum esse.

- si peccasses, doliturum fuisse.

XII. ADJECTIVAL CLAUSES.

A. These are related to the Principal Sentence like Adjectives, and introduced by the Relative or one of its Particles. See Rule, § 150.

B. Quominus, quin, require special notice.

(1) Quominus (=ut eo minus) follows Verbs and Phrases expressing impediment. (2) Quin (=qui non) follows Negative expressions and Interrogations. (3) Quin (=quod non) follows Negative and Interrogative expressions of doubt, prevention, prohibition, &c. Examples:-

(1) Nihil obstat quominus eam, Nothing stops me from going. Per me stetit quominus ires, I was the cause of your not going.

(2) Quis est quin fleat? Who is there but weeps? Nemo fuit quin fleret, There was none but wept.

(3) Nihil dubito quin gaudeant, I have no doubt they rejoice.

Nihil dubitabam quin gauderent, I had no doubt they rejoiced. Quid causae est quin gaudeant? What reason is there why they shall not rejoice?

XIII. Consecution of Tenses.

A. Examples of Consecution (see those in XI., XII.).

- · Quaero
 - quid agas, quid egeris, quid acturus sis. Quaeram
 - Quaerebam

quid ageres, quid egisses, quid acturus esses. Quaesivi Quaesiveram

ADDITAMENTA MEMORABILIA.

B. If the Perfect is Present-Past (I have inquired), it is strictly a Primary Tense, and should have Primary Consecution; but Cicero generally constructs it, even in that sense, with Historic Consecution.

XIV. ADDITAMENTA MEMORABILIA.

A. Negatives :-

a. Non, haud, deny: nē prohibits. Haud is chiefly used with Adjectives and Adverbs: as, res haud dubia; haud temere, &c. And with a few Verbs: as, haud scio, haud dubito.

b. Ne... quidem has the emphatic word or words between the Particles: as, Ne tu quidem, not even you. Either the Verb precedes with another Negative: as, Non practereundum est ne id quidem, even that should not be passed over.—Cic.; or it follows without one: as, Ne ad Catonem quidem provocabo, I will not appeal even to Cato.—Cic. Nēdum, with Subjunctive, shows that something is denied a fortiori, when compared with what was denied before. See § 147.

c. The Pronominal words quisquam, ullus, unquam, usquam, &c., are used with a Negative or Dubitative Particle: as, non, haud, si, num, &c., quisquam, ullus, &c. The Negative is contained in nemo (ne-homo), nullus (ne ullus), nunquam, nusquam, nequicquam, nequaquam, &c.

d. In Negative Consecutive Clauses are used ut non, ut nemo, ut nullus, ut nunquam, ut nusquam, &c.; but in Final Clauses ne, ut ne, ne quis, ut ne quis, ne quando, ut ne quando, ne quo, ut ne quo, &c.

e. Non quod (generally), non quo, non quin (always), take a Subjunctive.

f. For et nemo, write nec quisquam; for et nihil, neque quicquam; for et nullus, neque ullus; for et nunquam, neque unquam, &c.; for aio non, nego.

g. Neque (nec) is used for et non, except when the negative emphasis falls on a single word : as, Quaestio difficilis est et non profutura.

h. Non nihil, something; nihil non, everything; non nunquam, sometimes; nunquam non, always, &c.; non potui non ire, I could not but go.

B. Single and Double Questions.

|-------|--|--|---|---|---|----------------|
| num | | | • | | | an (or) |
| -ne | | | | | | an (or) |
| | | | | | • | an, anne (or). |

A negation in the second member is annon or necne.

- a. Qualis est tua mens? potesne dicere? What sort of thing is your mind? can you tell?-CIC.
 - An tu me tristem esse putas? Do you think I am downcast?-PLAUT.

b. Ante, circa, circum, circiter, citra, extra, infra, intra, juxta, pone, post, prope, supra, ultra, clam, coram, palam, super, subter, may be used as Adverbs.

ADDITAMENTA MEMORABILIA.

D. Participles:

a. The Participles are important elements in Latin, as in Greek, contruction. But the Latin language is less rich in Participles than the treek.

b. A Participle is the Attribute of one that acts, or has acted, or will ct; of one that is being acted on, or has been acted on, or will be cted on: to which we must add, of one that is meet for being acted n. A Greek Verb regularly and fully conjugated has Participles (inluding the Verbal in $\tau \epsilon \sigma$) representing all these categories; but Latin (erbs with Active and Passive Conjugation have the first, third, fifth, nd seventh (the Present Act., Future Act., Perfect Pass., and Gerunive) Participles, but want the second, fourth, and sixth, that is, the Perfect Active, Present Pass., and Future Pass. Participles. For the Herundive must not be regarded as Future, though it may in some laces contain the notion of future time.

c. Deponent Verbs Intransitive have three Participles: Present and Juture, both of which are Active in form and sense, and Perfect, which s Passive in form, but Active in sense: as, labor, labens, lapsurus, apsus. To these, Transitive Deponents add the Gerundive in dus: as, patior, patients, passurus, passus, patiendus.

d. The want of a Perfect Participle Act., in Active Verbs, is supblied in Latin either by the Finite Verb Active, with Relative or Paricle, or by an Ablative Absolute Passive: as, Tarquinium regem qui ion tulerim, Sicinium feram? Having refused to endure Tarquin as ting, shall I endure Sicinius?—Liv. Alexander, quum interemisset Ditum, vix a se manus abstinuit, Alexander, having slain Clitus, hardly refrained from suicide.—Cic. Pompeius, captis Hierosolymis, rictor ex illo fano nihil attigit, Pompeius, having taken Jerusalem, in the very flush of victory, meddled with nothing belonging to that temple. —Cic.

e. The want of a Present Participle Passive is supplied by the Finite Passive Verb with Relative or Particle: as, Pueri, qui-quum-dum locentur, discunt = Greek of $\pi a \hat{a} \delta s \delta i \delta a \sigma \kappa \delta \mu e voi \mu a \nu \theta \delta vooi, Children$ by being taught learn. Rarely the Perf. Participle takes a PresentPassive sense: as, Sperata victoria (Lav.) = victoria quae speratur.

f. A Future Participle Passive is not often used even in Greek. In Latin the Finite Verb with Relative stands for it: as, Grata superveniet quae non sperabitur hora, Welcome will arrive the hour that shall be never hoped for.—Hor.

g. The Perfect Participles of some Deponent and Semi-Deponent Verbs are occasionally found in a Present Active sense: as, ausus, fisus, diffisus, gavisus, ratus, solitus, usus, veritus: as, Cæsar, veritus ae noctu hostes profugerent, duas legiones in armis excubare jubet, Cæsar, fearing the enemy would escape in the night, ordered two legions to keep watch under arms.—Cæs. See § 62 Note.

h. Many Participles are used as mere Adjectives: as, negligens, patiens, sapiens, doctus, venerandus tremendus, &c. Many appear as Substantives. Such are, amans, adolescens, sponsus; nupta, sponsa, coeptum, dictum, factum, praeceptum, &c. The nouns, man, men, thing, &c., are frequently to be understood with Participles: as, Jacet corpus dormientis ut mortui, The body of a sleeping person often lies as of one dead.—Crc. Grande locuturi nebulas Helicone legunto, They that would utter a sublime strain must cull mists from Helicon.—PERS. Male parta male dilabuntur, Ill gotten, ill go.—Crc. Beatos duco, qui aut faciunt scribenda, aut scribunt loquenda, I deem them happy, who either do things fit to be written, or write things fit to be spoken.—PLEN. See § 142. Also § 107 d.

E. Active and Passive Construction:

 α . When an Active Transitive Sentence is changed into Passive Construction, the Object becomes Subject, and the Subject becomes Ablative of the Agent: as,

Act. Egregie consul rem gessit.

Pass. Egregie ab consule res gesta est.

The consul conducted the affair excellently.-LIV.

b. When an Active Intransitive Sentence is changed into Passive Construction, that Construction is Impersonal; the Subject becoming Ablative of the Agent; as,

Acr. Hostes constanter pugnabant.

PASS. Ab hostibus constanter pugnabatur. The enemy fought steadily.—CAES.

c. If the Active Verb had a Genitive, Dative, or Ablative Case with it, the Passive Construction retains that Case: as,

- Act. Medicinae nos indigemus.
- Pass. Medicinae a nobis indigetur. We need medicine.—CIC.
- Act. Mihi isti nocere non possunt.
- PASS. Mihi ab istis noceri non potest. They cannot hurt me.-CIC.
- Acr. Litibus et jurgiis supersedere vos aequum est.

PASS. Litibus et jurgiis supersederi aequum est.

It is fair for you to abandon strife and wrangling.-Lav.

(a) The Ablative of the Agent, like a Pronoun Subject, is often understood in the Impersonal Construction; as, Itur in antiquam silvam, *They go into an ancient forest.*—VIRG. Nunc est bibendum, *Now we must drink.*—Hor.

(b) Hence it appears that Passive Verbs govern the same Cases as Active Verbs, except only the Accusative of the Object.

(c) Quasi-Passive Verbs (§ 72) have the construction of Verbs Passive; as, Testis ab reo fustibus vapulavit, *The witness was beaten with* cudgels by the defendant.—QUINT. Malo a cive spoliari quam ab hoste venire, *I would rather be stript by a citizen, than be sold by a foe.*—QUINT.

III. NOTES ON PROSODY.

Metre:---

A. (a) Dactylic Hexameter or Senarius.

This Metre has six feet. The first four may be Dactyls or Spondees. The fifth must be a Dactyl (rarely a Spondee). The sixth a Spondee.

| | | Sche | me. | | |
|---|---|------|-----|-------|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| | | | | _ ~ ~ | |

Examples.

1. Sīcēlĭ dēs Mū sae || paū lo mā jora ca nēmus.

2. Non om|nes ar|busta || ju|vant humi|lesque my|ricae.

A break in a word, called Caesura, is usually made after the first syllable of the third foot, as after -sae, in (1). This is called a *strong* Caesura. If the break occurs after the second syllable of a Dactyl, as after -ta in (2), it is called a *weak* Caesura. Occasionally,

150

the chief Caesura occurs after the first syllable of the fourth foot, as in the following verse:

Clāmo rēs sīmul | horrēn | dos 1 ād | sīdera | tollit.

The Heroic Measure of Epic poets, Virgil, Lucan, &c., consists of Dactylic Hexameters only.

(b) Dactylic Pentameter:

This Verse consists of two parts, called Penthemimers, which are kept distinct. The first Penthemimer contains two feet (Dactyls or Spondees) and a long syllable. The second contains also two feet (both Dactyls) and a long syllable.

Example.

Tū pătěr | ēt mā | tēr || tū mĭhĭ | frātěr ĕ | rās.

This Verse is not used alone, but follows an Hexameter in the Elegiac Distich: as,

> Donec eris felix, multos numerabis amicos, Tempora si fuerint nubila, solus eris.

The chief Elegiac poets are Ovid, Tibullus, and Propertius.

B. (a) Iambic Trimeter or Senarius:

This Metre has six feet. Each may be an Iambus: as,

Sŭīs | ĕt īp|să Roma viribus | ruit.

But a Spondee may stand in the first, third, and fifth foot; and (rarely) a Dactyl or Anapaest $(\frown \frown -)$ in the first. A Tribrach $(\frown \frown \frown)$ sometimes takes the place of an Iambus, except in the two last feet.

Scheme.

The usual Caesura is after the first syllable of the third foot. Another,less usual, is after the first syllable of the fourth foot; as,

Ĭbē|rĭcīs | pĕrūs|tĕ 🛛 fū|nĭbūs | lătus.

The Trimeter may form a distinct measure.

(b) Iambic Dimeter.

This Verse leaves out the third and fourth feet of the Trimeter, with which it is used to form an Iambic Distich; as,

> Pătēr|nă rū|ră bō|bŭs ēx|ērcēt | sŭis, Sŏlū|tŭs ōm|nī fē|nŏre.

Horace uses this and also the single Trimeter in his Epodes.

C. The Sapphic Stanza:

This Stanza contains four lines. The three first are the same Verse repeated (Sapphicus Minor). The fourth is called Versus Adonius.

letters in Greek, § 1. *Annexive Relation, that by which one word is annexed to another, so as to take the same construction. § 146.

Clause called Protasis (προτείνειν, to stretch before). N.S. XI. B. Appositum (apponere, to place beside), an Apposite, or Substantive placed

beside another in Attributive relation. \$\$ 87,90. See p. 2. Asyndeton (à, not, συνδεΐν, to bind together), the annexing of words

without a conjunction. Attractio (attrahere, to draw to), a Figure of Syntax. § 159 N.S. I. E. 2. Attributive Relation, the relation of an Attribute or Apposite to the words they qualify. This relation may be (1) Epithetic: as, Croesus dives; Croesus rex. (2) Attributively Enthetic (see Enthesis): as, Croesus, regum ditissimus, vincitur; Croesus, rex Lydorum, vincitur. (3) Adverbially Enthetic : as, Croesus non dives interiit; Croesus non rex interiit. (4) Complemental: as, Croesus fuit dives; Croesus fit rex. § 87.

Attributum (attribuere, to assign), Attribute; an Adjective assigned to qualify a Substantive. §§ 87, 89.

Casus (cadere, to fall), Case. Gr. $\pi \tau \hat{\omega} \sigma_{is}$. A. By Case is meant the form given to a Noun or Pronoun in order to show the relation in which it stands to some other word in the sentence. Case (casus, from cado)

is, literally, a falling. Grammarians represented that form which a Noun takes when it is the Subject of a sentence, by an upright line, as AB, and likened the other forms to lines falling away from the perpendicular at various angles; as, A C, A D, A E, A F, &c. These they called Cases; and their series, the declension, declining, or sloping

down, of the word. Afterwards, the Nominative or Subject case was called (with evident impropriety) Casus Rectus, the Upright Case, and the others (except the Vocative) Casus Obliqui, Oblique Cases; whereas the Stem (or Crude-form) of the word is more properly the upright line, and the several Cases, including the Nominative and Vocative, are branches deflecting from it. So, from the Stem nuc- (walnut-tree) the Cases are: N.V. nuc-s (=nux), Acc. nuc-em, G. nuc-is, D. nuc-i.

B. The Relations which Cases fail to express are supplied by Prepositions; and in the languages of modern Europe the use of Prepositions prevails, and Declension is comparatively rare. Thus the languages derived from Latin (Italian, French, Spanish, and Portuguese) have only one Case-form in each Number for Nouns; English, two; German, four; but the Possessive Case in English is of limited use, and German Declension is freely developed only in the Articles. Of the ancient Aryan tongues, Sanskrit had the six Latin Cases and two more, the Instrumental and the Locative. Greek had only five cases in use, discarding the Ablative, the functions of which it divides between the Genitive and the Dative; but it retains traces of the Instrumental and the Locative. Latin retains many fragments of the Locative Case, as shown here and there in this Grammar; while the Pronominal forms, mihi, tibi, sibi, nobis, vobis, ubi, ibi, together with the Cases in -bus, appear to spring out of the primitive Instrumental Case, though in meaning they have lost all connection with it.

C. The primary force of the Cases is a much debated and still undecided question. Modern Grammarians have been inclined generally to explain it by relations of place and extent; and there is much speciousness in the theory which, taking the Nominative as the moving agent, regards the Ablative as the point which motion leaves, the Accusative as that to which it extends, and the Dative as the point of rest. But this theory fails to account for the Sanskrit and Latin Genitive; and against it may be urged that it assigns to the Ablative a place which in Greek is taken by the Genitive, and also that the Latin Ablative includes uses hardly consistent with that which is here stated to be its distinctive use. In this book classical usage has been followed, but without prejudice (it is hoped) to the future study of philosophical grammar.

Causalis Clausula, a Causal Clause; an Adverbial Clause introduced by quod, quia, quum, &c. § 152. N.S. XI. Character ($\chi \alpha \rho \alpha \kappa \tau h \rho$, an impressed mark), usually means the last letter of the Stem of an inflected word. § 11.

Circumstantive Relation, the relation in which a Word or Phrase stands to the Verb when it modifies it adverbially. Such is that of Adverbs, Prepositions with their Cases, the Ablative Case always, the Accusative Case often.

Clausula (claudere, to inclose), a Clause. This term is used to express any SubordinateSentence. Co-ordinateSentences are also called Clauses, but are not discussed in elementary Grammar. See Enthesis.

The Gerundive is the Latin Participle in dus, and the Gerund is probably its Neuter Singular, declined as a Substantive, and attached to the Infinitive Verb-noun. This term includes the three Substantival Clauses: Oblique Enunciation, Petition, and Interrogation, though sometimes used with special reference to the construction of Accusative-and-Infinitive (Infinitive Clause), which is the chief form of Oblique Enunciation or Narration. N.S. x. A. B.

GLOSSARIUM GRAMMATICUM.

Oblique Subject, the Accusative Subject of an Infinitive. § 94.

Oblique Complement, the Accusative Complement of an Oblique Copulative Clause. § 94. N.S. II. A., III. D.

- Partitiva Vocabula (partiri, to divide). N.S. VI. B.
- Passiva Vox (pati, to suffer), the Passive Voice, or form used in Verbs to show that something is acted upon, and so 'suffers.' This Voice is proper to Transitive Verbs only; but many Intransitive Verbs use it in Impersonal construction. § 76. A Passive Verb is often Reflexive; as, vertor, I turn myself. For Passive Construction see N.S. xIV. E.
- Patronymicum (πατήρ, father; ὄνομα, name), Patronymic, a title expressing descent from a father or ancestor.
- Perfectum (perficere, to complete) Tempus, the Perfect Tense, which in Latin has a double use. § 48. N.S. XIII.

Perfect-stem. §§ 46, 48. Periphrastic Conjugation ($\pi\epsilon\rho\iota\phi\rho\delta(\epsilon\iota\nu, to speak circuitously)$). § 64.

- Petitio Obligua. As Petition (command or entreaty) is the second of the three forms of Simple Sentences, so Oblique Petition is the second of the three kinds of Substantival Clauses. N. S. x. A. (2).
- Phrasis (ppdois), a Phrase; a combination of words, or a single word idiomatically used, containing a notion, but not forming a Clause or an Enthesis; as, multae artis, ruri, Preposition with Case, etc.
- Position (situs), a term in Prosody to express that a vowel is short.
- long, or doubtful, by standing before other letters. § 162. Praedicatum (praedicare, to declare), the Predicate of a Sentence, or that which is declared of the Subject. Writers on Logic resolve every proposition into Subject, Copula, and what they call Predicate. But in Grammar this would only mislead, for it is not in this form that authors write. Since every Finite Verb is Predicative, inaccuracy is avoided by calling the Verb a Predicate only when it completes Predication, but in other instances 'the Verb of the Sentence.' When the Verb is the Copula or a Verb Copulative, the term which links it to the Subject, and completes the Predication, is called Complement (instead of Predicate), by which the inconvenience of giving the same title to Nouns and Verbs is obviated. \$ 87.
- Praepositio (praeponere, to place before), Gr. $\pi \rho \delta \theta \epsilon \sigma \iota s$. §§ 9, 83, 103, 122. N. S. XIV. C.
- Predicative Relation, the Relation existing between Subject and Verb of the Simple Sentence.
- Present-Stem. §§ 11, 46. The Present-Stem of many Verbs differs from the True Stem. The chief variations are these:

- 1. N is inserted before the Consonant-character: as, fi-n-do, fra-n-go, &c. Before a labial this n becomes m: as, la-m-bo, ru-m-po.
- 2. N is suffixed (a) to a Vowel-character: as, si-n-o, li-n-o; (b) to a Liquid-character: as, tem-n-o, cer-n-o, sper-n-o, So po-n-o for pos-n-o. ster-n-o.
- 3. Sc is suffixed (a) to a Vowel-character: as, pa-sc-o, ira-sc-or, cre-sc-o, &c.; (b) to a Consonant-character with i: as, ulc-ise-or. So di-se-o for dic-se-o; na-n-c-ise-or for nac-or.
- 4. L is doubled: as, pel-l-o, tol-l-o.
- 5. T is suffixed to Guttural-character: as, flec-t-o, pec-t-o, nec-t-o.
- 6. A Guttural is cast out : as, stru-o for stru-c-o, vivo for vi-g-uo.
- 7. The Stem is re-duplicated : as, gi-g-no for gen-o, si-sto for sto.

*Prolative Relation (proferre, to extend), that in which Predication is extended by an Infinitive (therefore called Prolative), joined to Verbs, Participles, and, poetically, Adjectives. § 140. N. S. vn. B. Attentive consideration shows that this use of the Infinitive is really distinct from its Objective use, constituting a special relation in grammar, and requiring a distinctive appellation.

Pronomen (Gr. avtwvulla), an inflected Part of Speech, ranking among Nouns, and so called because it is a substitute for a name. § 38. Propria Nomina, Proper Names; Nouns peculiar to Person or Place.

Proprietive Relation, that of the Genitive to the word proper toit. § 126. Prosodia (προσάδειν, to sing in accord), Prosody; that division of Gram-mar which treats of Quantity of Syllables and of Rhythm. The

Laws of Metre are usually comprised in it. § 161. Notes. Protasis. See Apodosis.

R.

* Receptive Complement, an idiom, by which the Dative stands in the Complement, often with another Dative. § 108.

- Receptive Relation (recipere, to receive), that of the Dative, as Case of the Recipient, to the governing word. § 104-109. N. S. IV. Recta Oratio, Direct Oration, in a Principal Sentence, as distinguished
- from Oratio Obliqua. N.S. x.
- Reduplicatio (reduplicare, to redouble), Reduplication; a peculiar mutation of form, by which the sense of words is varied, in Greek, Latin, and other languages. In Latin, its chief use is in forming the Perfect-stem of Verbs. See §§ 48, 81 II. (5), III. 9.
- Perfect-stem of Verbs. See §§ 48, 81 II. (5), III. 9. Reflexiva Pronomina (reflectere, to bend back), Reflexive Pronouns: se, with its Possessive suus; so called, because they 'bend back' their relation to the principal noun preceding; generally (but not
- always) the Subject of the Principal Sentence. § 145. N. S. VIII. Relation. The Relations of Construction existing between the words of a Simple Sentence are eight in number: (1) Predicative; (2) Attributive; (3) Objective; (4) Receptive; (5) Circumstantive; (6) Proprietive; (7) Prolative; (8) Annexive. See these Words.
- Relativum Pronomen (referre, to refer), the Relative Pronoun qui, so called because referred to an Antecedent Noun-term. See §91,

N.S. 1. From this root are derived the Interrogative and Indefinite Pronouns, and the Particles connected with them. In Latin Syntax the importance of the Relative is great.

Root, the common part of kindred words : as, ag- in ago, agito, agmen. § 11.

S.

Scansio (scandere, to climb), the measurement of feet in a verse.

Sententia (sentire, to express thought), a Sentence. § 87. Sentences are Simple or Compound. A Simple Sentence is either a statement (enunciatio), a command or request (petitio), or a question (interrogatio). A Compound Sentence consists of two or more Simple Sentences linked together, one being the Principal Sentence, the rest either Co-ordinate (not dependent) or Sabordinate (dependent in construction); which two kinds are called Clauses. N. S. x. A. See Clausula.

- Spirants (spirare, to breathe). § 3. See Consonantes. Stem, the crude form of a Word without the Endings: as, mensa-, mone-. A Vowel-stem stripped of its vowel is called a Clipt Stem: as, mon- for mon-e-.
- Subjectum (subjicere, to place under), Subject. §§ 87, 88, 93, 94. N. S. I. II.
- *Subobliqua Clausula, a Suboblique Clause, subordinate to Oratio Obliqua. If Oratio Obliqua is contained in the sense only, not in form, the Subordinate Clause is said to be 'Subobliquae potestatis,' of Suboblique power, or 'virtually Suboblique.' N. S. x. B.
- Substantival Clauses, the three forms of a Simple Sentence (statement, command, question) thrown into Oblique Construction, and called Oblique Enunciation, Oblique Petition and Oblique Interrogation. N. S. x. A.
- Substantivum (substare, to stand beneath), a Substantive, the first of the inflected Parts of Speech. §§ 9 I. (1), 12, 16, etc.
- Superlativus Gradus (superferre, to carry above), the highest Degree of a Compared Adjective or Adverb. §§ 35-37.

Supine-Stem. § 47.

Supinum, Supine, an unmeaning term, applied to the two Cases of the Verb-noun which end in um and u severally. §§ 45, 141 (5) (6).

- Syllaba ($\sigma v \lambda \lambda a \mu \beta \dot{a} v \epsilon_i v$, to take together), a Syllable; that is, one or more letters pronounced in a breath. § 5.
- Syncope (συγκόπτειν, to cut short), the shortening of a word by casting out an inner vowel: as, patri for pateri.

Synesis (ouveois, meaning), a Figure of Syntax. § 160. N.S. i. E. 3.

Syntaxis (συντάσσειν, to arrange together), that division of Grammar which treats of the construction of sentences.

Temporalis Clausula, a Temporal Clause: an Adverbial Clause introduced by a Conjunction of Time. § 152. N.S. xi.

Tempus (time), Tense; that which marks the time of action in Verbs. §§ 43, 48.

Tempus (time), Quantity. § 162.

GLOSSARIUM GRAMMATICUM.

*Trajectiva (trajicere, to throw over); Verbs and Adjectives, which take a Dative. Pure Trajective Verbs have a Dative alone (Cui-Verbs): Trajective Verbs Transitive (Cui-quid Verbs) have Accusative and Dative. § 104. N.S. iv. Transitiva Verba (transire, to pass over), Verbs which pass over to an

Accusative of the nearer Object. § 96 N.S. iii.

U.

Universalia, a large class of Pronouns and Pronominals. N.E. III.

v.

- Verb of Being (sum, esse). Gr. βημα ύπαρκτικόr. This has been trans-lated by Latin Grammarians, 'Verbum Substantivum'; a term not true to the Greek, and confusing to learners. Sum is the Verb of Being, essential to the expression of thought. It supplies the Copula of Grammar and Logic. Hence we find its root widely spread throughout the languages of the world. §§ 49, 87. N. S. II.
- Verburn (Gr. $\hat{\rho}\hat{\eta}\mu a$, the word), Verb; an inflected Part of Speech, so called, as the Word which effects discourse. §§ 9, 39, etc.
- *Verb-Noun. All the parts of the Verb Infinite are Verb-Nouns Sub-stantival or Adjectival, uniting functions of the Verb with functions
- of the Noun. §§ 45, 140, etc. N. S. I. C. Vocales (vox, voice), Vowels. § 2. Their relations are shown in the following scheme, in which the sign F represents the vowel wavering between i and u (optimus, optumus), which the Emperor Claudius brought for a time into public use:

Standard vowel

a

Sharp medial e o Flat medial

Sharp semiconsonant i u Flat semiconsonant F Medial

J and u did not exist anciently. J was introduced to represent the consonant power of i; u to represent the vowel-power of v. Vocativus Casus (vocare, to call), the Case of one addressed, which

- stands out of the Sentence. §§ 14, 87, 137.
- Vowel-change, the weakening or strengthening of Vowels, which occurs in Flexion, Derivation and Composition. It appears in the formation of the Perfect and Supine Stems of Verbs, and in the change of many Simple Verbs when compounded. §§ 81, 84. N. E. II.

PUBLIC SCHOOL LATIN PRIMER.

Edited with the Sanction of the Head Masters of the Public Schools included in Her Majesty's Commission.

THIS Latin Primer-which is now in use in all the Nine Schools named in Her Majesty's Commission, viz. Winchester, Eton, St. Paul's, Westminster, Merchant Taylors', Duche, Charne Marchant Rugby, Shrewsbury, Harrow, and Charter House, — is founded on a Latin Grammar which has been largely used in English Schools during the last when the second starting the last wenty years. It has been revised with great care and attention, first by its Author, subsequently by the Head Masters of various public schools, with the advice of other

scholars engaged in classical inscholars engaged in classical in-struction. In the manner of its use, this book does not differ from the Grammar on which it is founded, or from any other synthetic grammar. Its memorial lessons need discreet guidance, careful explanation, and sound catechesis on the part of the masters. They need also to be sup-ported and supplemented by good exercise-books (such as *Subsidia Primaria*, now in the press) of a merely analytic and imitative cha-racter. racter.

LATIN SCHOOL BOOKS

ADAPTED TO THE PUBLIC SCHOOL LATIN PRIMER.

The First LATIN PARSING BOOK, adapted to the Public School Latin Primer. By JOHN T. WHITE, D.D. of C. C. C. Oxford ; Joint-Author of WHITE and RIDDLE's Latin Dictionary. 12mo. price 2s.

THIS Parsing Book has for its object the gradual teaching of the structure of the Latin language in accordance with the Rules laid down in the Syntax of the Public School Latin Primer. It consists of Two Parts. In the First, each Rule of Syntax has been eluci-dated by the relection of a Passage or portion of a passage from a standard writer, and by its analysis in such a way as to bring out an exemplification of the rule. Care has also been taken to render the course of instruction altogether progressive. altogether progressive. In the Second Part the Author, reversing

his mode of proceeding, has presented to the learner the Passages themselves as they are found in the writers from whose works they have been taken, and that without any guide to the construction of their several parts. By reading them as thus printed, the pupil's attainments may be readily tested; and it may be at once seen whether his knowledge, not merely of parsing, but of the words which he has had brought before his notice, is really such as from his training it ought to be. A YocaBULARY is given of all the words occurring in the work.

BRADLEY'S CORNELIUS NEPOS, with Grammatical Notes adapted to the Public School Latin Primer. By JOHN T. WHITE, D.D. 12mo. price 3s. 6d.

London: LONGMANS, GREEN, and CO. Paternoster Row.

BRADLEY'S SELECT FABLES of PHÆDRUS, with Grammatical Notes adapted to the Public School Latin Primer, and a Vocabulary on the plan of WHITE's 'Junior Scholar's Latin Dictionary.' By JOHN T. WHITE, D.D. 12mo. 2s. 6d.

Junior Scholar & Latin Dictionary. By Two the new editions of Phædrus, Eutropius, Cornelius Nepos, Dr. Wmre has altogether remodelled the notes and adapted their grammatical portion to the Syntax of the Public School Latin Primer. This he has done from a conviction, based on careful and dispassionate examination, that that Syntax is more philosophical, more simple, and bet-ter adapted for the instruction of boys whose reading does not exceed its limits than any found in any elementary Grammar which has yet appeared. The Phædrus and Eutropius are each ac-companied by a Vocebulary of the words which they respectively contain. To this portion of the works, which is written on the plan of Dr. WHIR'S Junior Scholar's Latin-English Dictionary, much information formerly embodied in the Notes has been transferred. And it should further be no-

ticed, as an important feature attach-ing to it, that here also will be found an accord with the *Public School Latin Primer*. The principles which guided Dr. Warrs in the preparation of the various Latin-English Dictionaries to which his name is attached will be found fully and systematically de-veloped in his *Latin Suffixes*; and a compar-ison of that work with so much of the *Public School Latin Primer* as speaks of the forma-tion of words will show a harmony of thought upon the subject between the Authors of the *Latin-Erglish Dictionary*; a Dictionary-in-deed the *only* Dictionary-in which the above-named principles form the basis of the treat-ment of its words, and which, by the mode of printing adopted, exhibits them to the eye at a glance. ticed, as an important feature attacha glance.
