PREFACE

THE chief purpose of *Word and Sentence Drills* is to provide constructive work on the various principles for students of Gregg Shorthand. This work is presented, first, in the form of words which can be written under given principles, taken up progressively to correspond with the lessons of the *Gergg Shorthand Manual*. The lists of words in each lesson are followed by a series of graded sentences involving words that must be constructed from principles, wordsigns, and phrase forms. The book is designed to supplement the *Manual* by furnishing sufficient drill on each principle to give the student skill not only in the application of the rule, but in the handling of a comprehensive vocabulary that will be of great value to him when dictation on new matter is encountered.

The book has been arranged carefully for easy reference. Each list is introduced by a reference to the paragraph number of the *Manual* in which the principle is presented, followed by a summary of the rule or principle, so that the teacher can make selections for assignment or practice without confusion or loss of time. It is also arranged so that teachers may make assignments from the lists or sentences in convenient units to meet varying conditions.

In selecting the word lists in *Word and Sentence Drills*, first consideration was given to their value in *developing word-building power*, but at the same time their importance as a contribution to the student's permanent, useful working vocabulary was a factor that received careful thought. As a result, the lists of words and sentences will be found to be of great utility in laying the foundation for early dictation.

HOW TO USE WORD AND SENTENCE DRILLS

To the Teacher: It is suggested that the words and sentences be assigned in convenient units for home or class work, to follow the study and practice of a corresponding section of the shorthand *Manual*. For example, after developing the rule for joining circles inside of curves, the list of words coming under this principle may be utilized with great advantage — first, in testing the students' knowledge of the principle, and, second, in furnishing execution and dictation drills after corrections of the shorthand forms have been made. The correct outlines for the words may be placed on the blackboard, and corrections made by the students, or papers may be exchanged and corrected by other students — or any other method that is deemed best may be followed. As the book contains an abundance of material — probably more than can be used with any one group — it will be necessary to arrange assignments to conform to conditions.

To the Student: The ability to write words from principle — that is, by applying the rules of the system promptly and correctly to any word encountered — is the surest road to shorthand skill. There is no substitute for this ability. *Word and Sentence Drills* provides material to assist you in developing that ability. The drills are supplementary to the *Manual*, and should be used only after you have studied and practiced the corresponding sections in the *Manual*.

Before writing any list of words refer to the *Manual* and review the rule or rules covering the particular list of words you are to write. This is to refresh your memory of the application of the rule. One of the chief sources of errors on the part of students is due to insufficient preparation on theory. The *Manual* illustrates every principle clearly and definitely. If you study these intelligently, you will make but few mistakes — and these ought to occur only when the question of individual judgment arises.

When you feel confident that you have a thorough understanding of the rule or rules, close your *Manual* and write the words in the list, applying the principles as correctly as possible. In doing this, reason out each outline. Go over it element by element to check it for errors. If you find an error, rewrite the word carefully. Try to use your judgment.

After writing your assignment, do not rewrite or practice the words until they have been checked and the correct outlines furnished by your teacher. The sentence drills, after correction, should be written from dictation until high speed in writing is acquired.

Friend Slade:

I have your favor of the 5th instant, in which you quote a price on that job I wrote you about. In reply I would say that your price is far above that given by other companies in this state. I shall give the job to Mr. Harry Frank, who does very good work of this kind.

If you will take the job at the same rate, you may have it. I will give you the next week in which to comply. Do not wait too long before sending a reply, for I shall not wait even a day after that.

Your friend,

JAMES STONE

Dear Sir:

We have your favor of May 4, and you will surely receive our new spring goods before the 10th instant. You will find the goods up to the mark as to make. We quote you a low price and hope to get your business.

Very truly yours,

Friend Davis:

Your letter of May 15 reached me this day. I will see the man about whom you ask in the course of a day or so; after which I will show him your letter if that plan suits you. I know he will be glad if you will name your own price on the lot. If that does not do, I shall see the fellow who represents him here in the city.

In a few days I will inform you if there is any change.

Very truly yours,

HENRY RICE

Dear Sir:

We have your letter of the 5th instant, in which you ask for a list of goods that could be put on sale at the county bazaar. In reply to your appeal we are shipping you some lace, fancy fans, chains, which I think should meet with a ready sale at your fair.

We hope you will realize something on these goods.

Yours truly,

Dear Sir:

In your letter of May 2, which reached me this day, you ask about Mr. Harry Crane. I have known Mr. Crane for a year or so. All I can say is that he does good work on every job given to him.

I am convinced that you will find him ready and willing if you give him a chance.

Yours very truly,

LETTER DRILLS

Dear Sir:

In reply to your letter of the 15th instant, we regret we must report that we cannot accept your friend as agent for our corporation in your territory. After looking into his record, we find that his references and the character of his work are not good enough for such an important office. In our opinion he is too young for us to give him charge of the difficult duties that go with this work. It is significant that the officials of the other company had to correct his invoices at different times and the small quantity of orders standing

to his credit was an occasion of regret to them.' In a strong organization like ours we must have agents who devote all their time to the business, whom we can trust in every respect, and who will look after the wants of our friends and bring in new ones.

From your long list of acquaintances in the state can you not suggest some one with more spirit, experience, and influence? We shall give consideration to any name which you care to send us.

Very truly yours,

Dear Sir:

In your letter of the 12th instant you find fault with the bill for the work on your car. Have you taken into consideration all that this bill covers? We call your particular attention to the difficult character of the work and the time it took. In an organization like ours those who do this work must have thorough experience and be particular about every little point. This we consider a duty to those with whom we do business; and while the charges may be a little more because of the care given to the work, we are certain you will agree with us that this is to your advantage. In return for the value we receive we always give quality and satisfaction.

Yours very truly,

(Supplementary Dictation, *Gregg Speed Studies*, pages 57, 58.)

DRILL ON SPECIAL BUSINESS ABBREVIATIONS

LESSON 12 AND LESSON 13

Page 86, paragraph 98; 94, paragraph 108

Dear Sir:

There is much truth in the following quotation: "The too well satisfied person sometimes stands still, expecting past effort to bring future profit." This is probably true of corporations as well as of individuals. You must not conclude that because your business seems to be firmly established at present, you can afford to be satisfied with what you have already accomplished. During these difficult times, it is necessary to devote all your energy to the work at hand, to exercise great care in managing your business, and to take advantage of every opportunity for the improvement of your particular industry. You cannot progress without using all the forces at your command.

You will find our new book, "Fortune and Misfortune in Business," of great value to you if you desire to secure financial independence. This excellent little book explains many things connected with business disturbances throughout the country, and will enable you to avoid the serious mistakes that some merchants are making at this time.

The book discusses many subjects which will be of distinct benefit to manufacturers, commission houses, and investors. You will not be disappointed if you purchase a copy.

The principal purpose of the book is to encourage further economy with business men in general, to give exact and expert information about the state of the market, and to consider certain important changes that are bound to occur in the immediate future and the effect which these changes will have on industry and commerce.

The book has accomplished wonders for others in your line of business. No publication except ours deals fully with these subjects, and many present-day prominent men have expressed the opinion that no other publication compares with it. We are convinced that every new purchaser will agree with them. Why not put several volumes in your office for the use of the officials of your company? The price is \$2.75 a volume.

Very truly yours,

Dear Sir:

In answer to your letter of February 5, I suggest that an experienced and intelligent man be placed in entire control of the enterprise in question. There should be no further controversy in regard to this matter, for that would only interrupt the making of the alterations and prevent the ultimate success of the venture.

Yours truly,

Gentlemen:

We are now prepared to make a contract with you for the construction of 200 electric cars, provided you will employ only expert and experienced workmen, who can be trusted to carry out our instructions in an intelligent and satisfactory manner. We shall reserve the right to determine what electrician shall arrange the distribution of the lights. We expect to use alternate red and white shades, thus securing a very pretty effect in lighting.

It is of the utmost importance that in the construction of these cars everything possible should be done to make both exterior and interior finish extremely handsome.

If you are willing to make a contract on the terms mentioned, please write promptly.

Very truly yours,

Gentlemen:

Although it is contrary to our usual custom, we have decided to make a contribution to the funds of your society and inclosed you will find our check for \$300.

Yours respectfully,

LETTER DRILLS

Mr. James McIntosh

Trenton, N. J.

My dear Sir:

Your kind letter of January 15 was received, and I must apologize for the delay in replying, which has been due to an extremely busy month. After fully considering the facts set forth in your letter, I do not believe that your suspicions are maintained by the circumstances of the case or that you have any right to decline to undertake the translation of the book on the terms referred to in the first paragraph of my last letter to you. It is self-evident that if you do not begin the translation of the work before July next, I shall be compelled to place the work in other hands, even if it should be necessary for me to supervise it.

If the demands upon your time will not permit your performing the task, I do not anticipate that you would have any difficulty in securing the services of Dr. MacIntyre, or someone else, to do it for you and under your general supervision. The central idea of the book and its relation to the religious discussions of the day will give to it an unparalleled interest to the public.

Yours very truly,

Messrs. McCabe and McKnight

Clinton, Ill.

Gentlemen:

Referring to our interview with your agent, Mr. Magnus, on the subject of introducing into our works the new self-feeding and self-controlling spool winder, will you kindly send us a detailed report of

the benefits claimed from the use of the patent? It occurred to us that these were magnified at the interview, but we are open to be convinced of the value of your invention and we shall be glad to instruct our manager to give it a trial. If the benefits are so self-evident, we shall adopt the patent.

Is the winder easily disconnected when it has accomplished its purpose, and can the worker become readily adapted to the use of the instrument?

Yours truly,

(Supplementary Dictation, *Gregg Speed Studies*, pages 95-98.)

VOCABULARY DRILL

BY SAMUEL HOFFMAN

MOUNT MORRIS JUNIOR HIGH SCHOOL, NEW YORK CITY

In the United States of America there has been brought into juxtaposition among us an unusual variety of races. Through the laboratory of the social crucible, a partial amalgamation has been effected. This conspicuous accommodation to the new situation has been designated by a versatile cosmopolitan author in one of his productions by the specific title of "The Melting Pot."

For the duration of the preceding century and not casually during the present generation, one ship after another from every quarter carried without accident a constant, steady stream of passengers who were thankful to behold our benevolent shores where the hitherto persecuted subaltern might gain civil equality and count upon our cordial sympathy for the struggle that he had made against a dangerous, degenerate rule from which he could apprehend nothing but disadvantage and disaster for himself.

This was the one glorious land in the universe where he could practically inherit the glory and luxury of this enormous country by volunteering to make application to come under the jurisdiction of its benignant, democratic people and its flag of forty-eight stars and thirteen horizontal red and white bars, a testimonial and authoritative messenger of our western civilization.

The property of our ignorant immigrant was then contained in a handkerchief parcel. Upon his introduction to the church congregation his casual remarks appeared to be incoherent and incomprehensible. He was anxious to engage in his vocation in a warehouse for various employers.

Every evening, regardless of the temperature registered by the thermometer, the schoolhouse became his headquarters. By perse-

vering, earnest study of our curious hieroglyphics his cloud of ignorance of the English vocabulary evaporated, so that he now could compose in manuscript form with proper punctuation a brilliant prospectus to develop and to husband our abundant resources.

The dividend for his indefatigable zeal was the inclosure discovered in his pay envelope to remunerate him as an approximate equivalent for his indispensable services. This will illustrate how America is the land of opportunity for comparatively all who amalgamate with us, who coincide with our views, and who reciprocate by becoming United States citizens really attached to our institutions and who desire modern doctrines to prevail by reason of their own self-cultivation, support, and annual vote on election day.

On that date occurs what may amount to a tranquil revolution. Every delegate chosen for our legislature intends to approve any legislative measure or economical expedient that dissatisfaction with conditions may warrant and to the legislator has the appearance of being consonant with the voters' civil verdict. He performs his righteous duty and is obedient so to legislate as to fulfill his part of the covenant with his electors by appropriate legislation.

It would be a demoralizing practice for an arbitrary executive or administrator to thwart the people's wish. If he should refuse to show his approval or should he revolutionize parliamentary procedure and institute unpopular, wholesale reforms instead, and deceive every assemblage or delegation, the public would not look with resignation upon the logic of such a course. His downfall would be almost instantaneous. No democrat would display such stupidity, nor provoke the people by trying to execute orders that are repugnant to them.

To check the unavoidable danger to health resulting from exorbitant, disproportionate prices for rent, flour, etc., laws which we specify as anti-profiteering bills were put into operation in 1920 by the New York legislature. It is the duty of the Secretary of State to promulgate these laws.

When litigation follows the complaint of a tenant versus landlord,

an attorney may prosecute for the misdemeanor of overcharging, or, likewise, for negligence to comply with the necessary obligation to give an adequate heat supply.

The authenticity of the signature to an affidavit by an absent deponent, corroborating the statements of the plaintiff, was proved; but the defendant proceeded to strengthen his testimony by proving conclusively the default of his bankrupt tenant to pay the rent for the apartment on the boulevard, at the address mentioned. The plaintiff then withdrew the case, offering his attorney Liberty bond coupons in payment for his services.

The architect could not qualify as an expert automobile salesman, but he could quote accurately the catalogue prices of iron, cabinet wood, and other building materials.
